HOW TO LOCATE DRIVE LINE PART NUMBERS

1. USE THE DRIVE LINE T.S.L. or STAMPED IDENTIFICATION NUMBER CROSS REFERENCE GUIDE.

Refer to page 6 of this section for a cross reference from stamped numbers on shaft or Truck Specification List (T.S.L.) driveshaft numbers to service part numbers.

2. USE THE DRIVESHAFT APPLICATION CHART.

- a. 1980 B-F600 series only. Refer to the stamped identification on the shaft and/or to vehicles T.S.L. for all other models.
- b. Manufacturer codes used throughout the chart are cross referenced as follows:  

D-Dana	E - Eaton	R - Rockwell (Timken)
--------	-----------	-----------------------
- c. Universal joint, slip yoke and flange yoke codes used throughout the chart are cross referenced to service part numbers on the next page.
- d. The Driveshaft "Types" and the "A" and "B" designations are illustrated on page 5 of this section. Group 4602 is a shaft assy. and incl. the shaft, universal joints and the slip yoke. Group 4A603 is a shaft assy. with slip yoke only. Group 4605 applies to the driveshaft only as shown on page 5 of this section. Various shafts listed throughout the Drive Line Cross are coded with symbol ●. After selecting the part number shown in the Driveshaft Reference Guide refer to page 19 of this section for the appropriate service replacement shaft. The service replacement shaft (4A603) incl. a new slip yoke. Service replacement shafts (4A603) are listed in part number sequence on page 34 of this section. The shaft length and diameter and also the slip yoke are shown for each shaft.
- e. Typical drive line and universal joint illustrations for single and tandem axles are shown on pages 3 and 4 of this section.
- f. Refer to section 46.3 for CF-CFT600/800 usage.

3. USE THE DRIVE and COUPLING SHAFT COMPONENT PARTS LIST.

When the part number for the complete shaft assembly is known, the part number of the shaft sub-assembly and related components may be found in the Drive and Coupling Shaft Component Parts List in section 46.1A.

4. USE THE DRIVE LINE ILLUSTRATIONS.

- a. Refer to the "Typical" drive line illustrations on pages 3 and 4 of this section to obtain a basic group number.
- b. Refer to the group number in the catalog. Determine the part number needed from that group or follow cross references to other groups to determine the part number needed.

5. USE THE ALPHABETICAL INDEX.

- a. Refer to the alphabetical part name index at the beginning of the catalog to obtain a basic group number.
- b. Refer to the group number in the catalog. Determine the part number needed from that group or follow cross references to other groups to determine the part number needed.

**HOW TO LOCATE COUPLING SHAFT and INTERMEDIATE COUPLING SHAFT PART NUMBERS**

1. USE THE DRIVE LINE T.S.L. OR SHAFT STAMPED NUMBER IDENTIFICATION CROSS-REFERENCE GUIDE
  - a. Refer to Section 46.1, page 6 for a Cross-Reference from stamped numbers on shaft or truck specification (T.S.L.) to service part numbers.
  
2. USE THE COUPLING SHAFT AND INTERMEDIATE COUPLING SHAFT APPLICATION CHART
  - a. B-F600 series only
  - b. Refer to vehicles T.S.L. and stamped identification on shaft for all other models:
  - c. Manufactures codes used in the rear axle column are Cross-Referenced as follows:

D-Dana	E-Eaton	R-Rockwell (Timken)
--------	---------	---------------------
  - d. Refer to section 48.3 and 48.7 for CF-CFT600/800 usage
  
3. USE THE DRIVE AND COUPLING SHAFT COMPONENTS PARTS LIST
  - a. When the service part number for the complete shaft assembly is known, the part number of the shaft sub-assembly and related components may be found in the Drive and Coupling Shaft Components Parts List in Section 46.1A.
  
4. COUPLING SHAFT AND INTERMEDIATE COUPLING SHAFT RELATED PARTS
  - a. Coupling Shaft and Intermediate Coupling Shaft Related Parts are shown in Parts List Form starting on page 5 of this section. Refer to steps 1 and 2 to determine the appropriate parts list number.
  - b. Coupling Shaft and Intermediate Coupling Parts Lists include the following items;

4635	Universal joint	4841	Slip yoke	4865	Flange rear u joint
------	-----------------	------	-----------	------	---------------------

Universal joints (4635), slip yokes (4841), and flanges rear u-joint (4865) are also listed under their respective group numbers by type and size.
  - c. Coupling shaft support plates (4831) are listed on the T.S.L. Code Section B21 and/or C01, obtain complete support plate number and use the Master Cross-Reference to cross support plate number to a service part number. The (4831) are also listed by code number with the related part number. For code to service number cross-reference refer to the Cross-Reference chart on page 2. To determine the appropriate part number of a support plate, refer to the Coupling Shaft and Intermediate Coupling Shaft Application Chart. Refer to page 6 of this section for the Application Chart Index.
  - d. Coupling Shaft and Intermediate Coupling Shaft "Types", and the "A" and "B" designations are illustrated on page 4 of this section. Group 4816 applies to the Coupling Shaft only as shown on page 4 of this section.
  
5. USE THE DRIVE LINE ILLUSTRATIONS
  - a. Refer to the "Typical" drive line illustrations on page 4 of Section 46.1 to obtain a group number.
  - b. Refer to the group number in the catalog. Determine the part numbers needed from that group or follow cross-references to other groups to determine the part numbers needed.
  
6. USE THE ALPHABETICAL INDEX
  - a. Refer to the alphabetical part name index at the beginning of this catalog to obtain a group number.
  - b. Refer to the group number in the catalog. Determine the part number needed from that group or follow cross-references to other groups to determine the part numbers needed.
