## SYMBOLS USED REGULARLY IN CATALOG

The following symbols appearing on text pages are to be interpreted as follows:

- \* Indicates Motorcraft Sales Part Number.
- # Indicates some form of identification such as part number, stamping, paint stripes and tags.
- ★ Symbol indicates part is not supplied for service for the following reasons:
  - a. Part is superseded and replaced as indicated in the description column of text.
  - b. Part can be improvised as indicated in the description column of text.
  - c. Due to its function there would be little or no demand.

NOTE: ALWAYS REFER TO THE DESCRIPTION COLUMN OF THE TEXT FOR POSSIBLE SUBSTITUTION, OR FOR MATERIAL SPECIFICATIONS AND DIMENSIONS WHICH MAY BE HELPFUL IN OBTAINING THE NON-SERVICED PART LOCALLY.

## GENERAL INSTRUCTIONS

This Ford Truck Master Parts Catalog contains replacement parts and accessories information for truck series B600/700, C-CT600/900, CL-CLT900, F600/800, FT800, L-LN-LNT-LT-LTS600/900 and LTL900 for model year 1980/ for U.S. and Canadian built vehicles. Also included are the related Diesel engine models, Series B600 thru LTS900. Unique Canadian part numbers and applications have been identified by a symbol (●) and footnoted. Unique U.S. part numbers and applications have been identified by a symbol (☆) and footnoted. Use this Text Catalog in conjunction with the Illustration Catalog, Form FPS 8473-B.

Refer to the Index on Page 1 for a listing of the items appearing in the General Information Section.

## HOW TO USE THIS CATALOG

There are three ways of finding part numbers if the group number is not known.

1. By Part Name
2. By Illustration
3. By Identification

Should an inquiry be received for an Accelerator Assy. for a 1981 CL-CLT:

### BY PART NAME -

- A. Refer to the Chassis Parts Alphabetical Index.
- B. Refer to the alphabetical nomenclature and find the part name "Accelerator Assy". The group number listed is 9725.
- C. Refer to group number 9725 and locate 1981 in the "YEAR" column. Find the series CL-CLT in the "MODEL/RESTRICTIONS" column.
- D. The part number shown is D8HZ 9725-A.

### BY ILLUSTRATION -

- A. Refer to the Illustration Catalog (Form FPS 8473-B) to the tabbed divider marked "FUEL, CARBURETOR, ACCELERATOR".
- B. Refer to the index immediately behind the divider and find the illustration titles for the 1981 CL-CLT Series.
- C. Under the heading "ACCELERATOR and TRANSMISSION" find the Accelerator Assy. illustration.
- D. Refer to the illustration designated (on page 1 of Illustration Section 97.1) and find the group number for the accelerator assy. basic 9725.
- E. Refer to group number 9725 in this Text Catalog and locate 1981 in the "YEAR" column. Find the series CL-CLT in the "MODEL/RESTRICTIONS" column.
- F. The part number shown is D8HZ 9725-A.

## HOW TO USE THIS CATALOG — Cont'd

### BY IDENTIFICATION —

Certain parts and most major assemblies are identified with a part number shown on an attached tag or plate or on the part itself. Reference to identification numbers is made throughout the catalog and cross reference charts are included in some sections to provide immediate knowledge of the service part number when the identification number is known. All identification information other than charts will be preceded by the symbol (#).

**IMPORTANT** — Identification tags and plates must be retained with the part or assembly with which they are originally supplied.

### R.H. AND L.H. PARTS

The driver's side is the left hand side of the vehicle and determines whether such parts as fenders, lamps, etc. are right or left hand.

Most Right Hand and Left Hand parts are listed in adjacent columns as shown in the following examples:

YEAR	MODEL/RESTRICTIONS	PART NUMBER		DESCRIPTION		QTY.
80	F600/800	(RH)	E0TZ 1020124-A	(LH)	E0TZ 1020125-A	1
80	CL-CLT900	(RH)	D8HZ 9020124-A	(LH)	D8HZ 9020125-A	1

### MOTORCRAFT SALES PART NUMBERS

To facilitate the stocking and handling of those service parts which are assigned both service part numbers and Motorcraft Sales Part Numbers, the Motorcraft Sales Part Numbers are preceded by an asterisk (\*) and are usually located at the beginning of the description column.

For example, refer to Section 96, group 9600. The service part number for a carburetor air cleaner element used on a 1982/C-CT600/800 -- diesel with an 8 cyl. 501N C.I.D. engine is E1HZ 9601-B and the Motorcraft Sales Part Number is FA 718. In the catalog this item will be shown as E1HZ 9601-B \*FA718.

YEAR	MODEL/RESTRICTIONS	ENGINE		PART NUMBER		DESCRIPTION
		CYL.	C.I.D. (C.C.D.)	AIR CLEANER ASSY.	ELEMENT	
82/	C-CT600/800 -- diesel	8	501N	E2HZ 9600-M	E1HZ 9601-B *FA718	Standard capacity

### FORMATS

Various formats are used throughout this catalog to coincide with the normal procedure for selecting the affected part numbers. Most areas of the catalog use a format arranged in the order shown below:

#### Column —

1. Model year
2. Type of vehicle or equipment within a specific model year
3. Complete part number
4. Description, size, etc.
5. Quantity required per vehicle

Formats peculiar to a particular area of the catalog are generally self explanatory. When necessary, instructions are shown at the beginning of the affected group. For instance, the various charts and parts list method of cataloging in the Carburetor Section are explained on Page 1 of Section 95.

## EXHAUST SYSTEMS CERTIFICATION

"For their intended application as specified in this catalog, the exhaust system parts and systems listed for sale have been certified to be in compliance with the requirements of the rules of the Florida Department of Environmental Regulation (Chapter 17-18, Part III of the Florida Administration Code)."

## EXPLANATION OF THE FORD PART NUMBERING SYSTEM

For greater convenience this catalog is divided into specific sections, such as brakes, front suspension, engine, transmission, etc. For example, FRONT SUSPENSION appears in Section 32, STEERING WHEELS in Section 36, REAR AXLE in Section 40, etc. The applicable exploded illustrations are contained in separate sections which are related to the Text Section numbers. For example, STEERING WHEEL illustrations appear in Illustration Section 36 of the Illustration Catalog, FPS 8473-B.

The part number groups, part names and the section numbers under which each is listed are shown on pages 5, 6, 7 and 8 of the General Information Section.

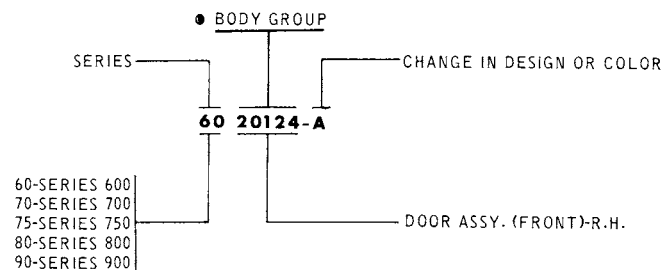

In numerical listings, expanded group numbers will be considered to follow the same sequence as the regular group numbers from which they are expanded and are arranged in Catalogs as follows:

3511  
3C511  
3518  
3C518

Illustrations contain group numbers only, therefore, it is necessary to refer to the group within this Text Catalog for complete applicable part numbers.

## BODY PARTS GROUP NUMBERING SYSTEM

FOLLOWING IS A DIAGRAM OF THE BODY PARTS GROUP NUMBERING SYSTEM

● These five digits comprise the Body Group Numbers used throughout each body parts section.

## MODEL YEAR APPLICATION

Model year application is indicated by showing the first year followed by a diagonal line to indicate continued usage in all subsequent years until the insertion of the last year of usage, which will then be inserted after the diagonal line. If no diagonal line is shown, the part is applicable only to the year indicated:

**Example:**

- 80/ Indicates part used 1980 through subsequent models.
- 80/81 Indicates part used 1980 through 1981 model years.
- 80 Indicates part used 1980 model year only.

## MODEL CODES

Truck models are listed throughout this catalog by truck series.  
 A listing of series codes shown on the Certification Label is included in this section on page 23 and 24.  
 Refer to this page to determine the series listed in the text of the catalog.  
 Model application is often consolidated as shown below:

**Example:**

- LN600/900 means LN600 thru LN900 or LN600, LN700, LN800 and LN900.
- and: L-LN-LNT-LT-LTS900 means L900, LN900, LNT900, LT900 and LTS900.

## SOFT TRIM

Soft Trim parts are arranged in a separate section by model year. For 1980/ refer to the Salesmen's Color and Trim Selections book to identify color, type and pattern of material. To determine the complete part number of a trim part, it is necessary to know the "Trim Code" which is shown on the Certification Label of the vehicle (refer to Page 38). Instructions for selecting soft trim parts are contained at the beginning of the Soft Trim Section.

### ATTACHING PARTS (NUTS, BOLTS, ETC.) and LOCATOR CODES

Standard and utility hardware, such as bolts, screws, fittings, etc. are listed below the part with which they are used. To facilitate the stocking and handling of standard and utility parts by Ford Dealers, locator codes are preassigned by Ford Parts and Service Division. The locator codes are shown in parentheses immediately following or below the standard and utility part numbers. For an example, refer to Body Section 000, group 01610. The part number for a plug-button for 3/8" hole is 379286-S and the locator code is PP-2-C. In the catalog this item will be shown as part number 379286-S with the locator code PP-2-C appearing at the beginning of the Description Column. In some charts, such as the Carburetor Parts List Charts in Section 95.1, 95.2, etc. the locator code will be shown next to or below the part number in the Part Number Column.

### LIQUID MEASURE

Most liquid measures listed in this catalog are in U.S. sizes and certain other liquid measures (unique to Canada) listed in this catalog are in Canadian sizes. The following chart provides an understanding and a translation of U.S. to Canadian and Canadian to U.S. sizes.

	1/2 Pint (CAPACITY IN OUNCES)	Pint	Quart (CAPACITY IN OUNCES)	Gallon
Canada	10	20	40	160
U.S.	8	16	32	128

Example - 5 U.S. Quarts (160 ounces) equal 4 Canadian Quarts (160 ounces) or 1 Canadian Gallon

### D.S.O., F.S.O., or L.P.O. (SPECIAL ORDERS)

The District Code Number will appear in the D.S.O. space on the Certification Label for all units including regular production. Always furnish appropriate Certification Label information and D.S.O. Number, if applicable, when ordering parts not listed in the catalog. If the unit is D.S.O., F.S.O. or L.P.O. (Special Order), the complete Order Number will appear in the D.S.O. space in addition to the District Code Number.

**IMPORTANT** - Many parts and assemblies used on these vehicles may be standard or optional on other models. When the assembly number is known, check the applicable identification and cross reference charts for possible service parts.

### ORDERS FOR DSO PARTS

Orders for DSO parts should be submitted through your Order Processing Center. The usual order information should be given when contacting the expeditor. For assistance in ordering DSO parts or with unresolved DSO parts problems, (except cabs, frames and power steering kits) dealers should contact the Domestic Special Order Section (313) 523-3333 For assistance in ordering cabs, frames and power steering kits dealers should contact Kentucky Truck Plant (502) 425-4245.

Note-The phone numbers listed above are for ordering and information on DSO and special order parts ONLY. All other calls for parts information should be directed to the Central Order Processing Section.

### HOW TO ORDER PARTS

When ordering parts, always give the complete part number.

In the event the part number is not known, the following information should be included:

- A. Complete description of part.
- B. Model, year and body type.
- C. Dimension, number of teeth, size, etc., if possible rough sketch of part.
- D. If applicable to engine, transmission, axle, steering, etc., specify type, such as 370 C.I.D., Transmission, Power Steering, etc.
- E. Advise how shipment is to be made - Freight, Express, Air, Parcel Post.

## BENDIX WESTINGHOUSE AIR BRAKE PARTS

The various Bendix Westinghouse air brake parts supplied by Ford Motor Company parts distribution centers are listed in their respective areas of the Catalog under the Ford group number and are shown in appropriate illustrations contained in the Ford Truck Illustration Catalog, Form FPS 8473-B.

Bendix Westinghouse parts which are not listed in the catalog may be obtained from your Bendix Westinghouse authorized distributor.

## CROSS REFERENCE LIST BETWEEN MANUFACTURERS' and FORD PART NUMBERS

A Cross Reference List to assist in the identification of Ford parts by means of various manufacturers' numbers which are generally known throughout the automotive industry is included in the 1980/ Ford Master Truck Catalog. Forms FPS 8473-A (loose-leaf) and FPS 8473-M (transparency). This Cross Reference List includes part numbers for 1980/ , 1973/79 as well as 1964/72 truck parts for all truck series for the following manufacturers or parts lines:

Bearing industry numbers for bearings, cups, etc	Hendrickson tandem rear suspension and related parts
Clark transmission and related parts	Miniature lamp and sealed beam bulb numbers
Dana Corporation axle and related parts	New Process transmission and related parts
Eaton axle pump and related parts	Rockwell Standard axle and related parts
Fuller transmission and related parts	Spicer axle, transmission and related parts
Funk Manufacturing Co.trans.power take-off parts	Stewart Warner speedometer gears and related parts
	Timken axle and related parts
	Warner transmission and related parts

## DIESEL ENGINE PARTS

Parts information in this catalog for the Diesel engines manufactured by Cummins Engine Company, Caterpillar Tractor Company and Detroit Diesel Engine Division is restricted to engine accessories and engine related parts furnished by Ford Motor Company. Refer to Sections 60.3, 60.4, 60.5, 60.6, 60.7 and 60.8 in this catalog. Other parts unique to these Diesel engines may be ordered from the appropriate engine manufacturer's distributor or dealer.

## HEAVY TRUCK POWER STEERING INSTALLATION PARTS

(For Current Production Models Only)

A program is available to supply dealers with all the components required to install power steering on heavy trucks built at the Kentucky Truck Plant. Orders should be placed with the Order Processing Center and must include the following information:

- Model year
- Series
- Vehicle serial number
- Front axle capacity
- Type of steering system, e.g. Steerease
- Type of brake system, e.g. Air, hydraulic
- Type of anti-skid control
- Build date

Prices and availability of components are listed in the General Information Section of the Price List.

## INDUSTRIAL ENGINE and POWER UNIT PARTS

Most of the normal replacement parts for 6 and 8 cylinder Ford industrial engines and power units are carried in Ford Car and Truck Dealers inventory and the 4 cylinder gasoline as well as the 4 and 6 cylinder Diesel parts are carried in Ford Tractor Dealers' stock. To obtain Ford industrial engines and power units as well as parts unique to these units, order direct from authorized Ford Industrial Product Dealers only.

**BODY TYPE DESCRIPTIONS**

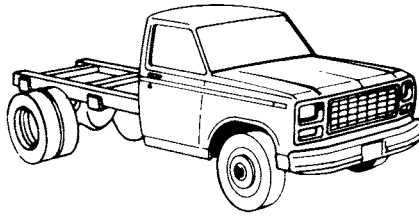

(Arranged in Alphabetical Sequence)

Most body parts and some chassis parts are listed according to Body Type such as 81, 91 etc. Body type and trim code information is shown in a 2 digit code for all Trucks except Cowl models which have a single digit code. The body type suffix such as (81)A, (81)B, etc. is not shown on the Certification Label. To determine the specific body type through certification label information refer to the codes listed above.

## 1980/ TRUCK SERIES 600/900

### MASTER CROSS REFERENCE GUIDE FOR THE TRUCK SPECIFICATION LIST (T.S.L.) SERIES 600/900

A revised T.S.L. for Louisville-built trucks was put into use on May 1, 1972 and was of the type shown on page 52. T.S.L.'s are reduced to a decal and located as follows:

B Series and F cowl models - taped in glove box, to be applied after unit is completed at body company.

C-CT Series - bottom of passenger door.

CL-CLT Series - wrap around gear shift lever with incomplete vehicle manual.

F Series (except cowl) and L-LN-LNT-LT-LTS Series - between back glass and door facing on passenger side of cab.

Use the listing below to determine service part numbers or parts lists for the numbers shown on the upper part of the T.S.L.

Use the information on page 45 to decode the information shown in the lower part of the T.S.L.

NOTE: Check the catalog even though the D.S.O. box is checked on the upper part of the T.S.L. Many parts and assemblies used on these vehicles may be standard or optional on other vehicles. If not listed in the catalog, order the part on a Special Order basis through the dealer's Order Processing Distribution Center.

T.S.L. LOWER SECTION

**GENERAL EXPLANATION**

a. Boxes are identified by combining the row designation (A, B, C, D, E) with the column designation (1 through 31) to form a coordinate, i.e. "A1".

b. Related parts are grouped on the form:

TYPE of PART	BOXES	TYPE of PART	BOXES
Brakes	A1 - A9	Power train	B1 - B22, C1 - C2
Electrical	A10 - A23	Speedometer and tach	C3 - C11
Exhaust and suspension	A24 - A27	Wheels, hubs and drums	C12 - C13
Steering wheel	A28	Cab detail	D1 - D18
Fan	A30	Miscellaneous	E1 - E26
GVW	A31		

c. Boxes are marked in several different ways:

1) If "\*" appears in a box, the part is a D.S.O. application and an explanation will appear in the lower portion after its coordinate (i.e. (D9HZ 90018A90 - A Graham roof vent"). Order the part number shown through the dealer's Order Processing Distribution Center.

2) If "X", a code number (1,2), or a code letter (A,B) appears in a box, refer to CODE EXPLANATION below to determine the meaning of the code.

EXAMPLE: "X" in Box A8 means the unit has a vacuum reserve tank, as noted under A8 in the listings below.

3) If "-" appears in a box, the item is not used on that unit or the item is "Standard Equipment". For instance, a "-" appearing in B13 on the T.S.L. for a truck with a manual transmission would indicate that the clutch used is the "standard" clutch for that unit.

4) In some cases, an engineering part number will appear in the box. This number may be converted into a service part number by using the Master Cross Reference List or the listing which is provided below.

d. Items which appear in the "Tires - Paint - DSO" Section without coordinates are D.S.O. items not covered in other portions of the Form.

## TRUCK SPECIFICATION LIST (TSL) – 1981/

An improved T.S.L. for Kentucky-built trucks was put into use on March 15, 1981 for LTL9000 units and on April 1, 1981 for the balance of trucks produced at Kentucky Truck. An example of this free-flow type T.S.L. is shown in column's 41, 42 and 43.

The In-Cab T.S.L. copy is located on the left sun visor (common position for all completed trucks) enclosed in a clear plastic sleeve. The T.S.L. will be included with the boxed parts for buses and stripped chassis.

Each new T.S.L. includes general information such as:

- Dealer order number
- Series and model
- Wheelbase
- Serial Number (last eight digits of vin number)
- D.S.O. reference number

In addition, a listing appears in commodity code sequence which includes:

- Commodity Code (0405)
  - Quantity required will be 1 unless indicated otherwise
  - Engineering part number (E0HT 4602-NCA)
  - T.S.L. description (Driveshaft assy.)
  - Part description – additional descriptive and proprietary information for U.S. Units only
  - Type part includes D.S.O. Option number, if applicable
- If blank, part is standard equipment or R.P.O. on this vehicle.

Commodity codes appear in numerical sequence on each T.S.L. and have been arranged as follows:

First Two Digits of Code	Major group	First Two Digits of Code	Major Group
01	Wheels, Hubs and Drums	10	Alternator, Battery, Cluster and Starter
02	Brakes	02	Brakes
03	Front Axle and Steering	20	Cab Detail
04	Rear Axle and Driveshaft	12	Distributor and Governor
05	Frame, Suspension and Exhaust	06	Engine
06	Engine	16	Fenders, Hood and Running Boards
07	Transmission and Clutch	05	Frame, Suspension and Exhaust
08	Radiator and Grille	03	Front Axle and Steering
09	Fuel System and Manifolds	09	Fuel System and Manifolds
10	Alternator, Battery, Cluster and Starter	18	Heater, Air Conditioning, Radio and Shock Absorbers
12	Distributor and Governor	13	Lamps and wiring
13	Lamps and wiring	99	Paint
16	Fenders, Hood and Running Boards	08	Radiator and Grille
17	Speedometer, Mirrors, Bumper and Wipers	04	Rear Axle and Driveshaft
18	Heater, Air Conditioning, Radio and Shock Absorbers	17	Speedometers Mirrors, Bumper and Wipers
20	Cab Detail	07	Transmission and Clutch
99	Paint	01	Wheels, Hubs and Drums

The second two digits of each code identify specific parts within a major group.

Once the engineering number has been determined from the Commodity Code Listing, use the Master Cross Reference and/or Master Parts Catalog to select the service part number required. D.S.O. parts should be ordered through your Master Parts Distribution Center.

### ADDITIONAL COPIES T.S.L.

For model years 1978/, order from the "Ford Parts and Service Division, Special Order Section P.O. Box 3020 Livonia, Mich. 48151".

### LIQUID MEASURE

Most liquid measures listed in this catalog are in U.S. sizes; however, those measures which are specified for unique Canadian parts are in Imperial or Metric sizes.

The capacity in ounces and litres for both U.S. and Imperial measures are specified below:

	1/2 PT.	PINT	QUART	GALLON
Imperial	10 oz. (284.1 ml)	20 oz. (568.2 ml)	40 oz. (1.136 l)	160 oz. (4.55 l)
U.S.	8 oz. (236.6 ml)	16 oz. (473.1 ml)	32 oz. (.946 l)	128 oz. (3.78 l)

HOW to IDENTIFY WHEELS, RIMS, FLANGES and LOCK RINGS

1. Many wheels and rims may be identified by a stamping number. When the stamping number is known, refer to the Guide on Page 1 for the appropriate service part number.
2. When the stamping number is not known, wheels and rims and their related flanges and lock rings may be identified as follows
  - (a) Determine the type of wheel or rim from the illustration below.
  - (b) Determine the size of the wheel or rim. If this is not known, check the tire size and refer to the tire size to Wheel or Rim Size Chart on page 4 of this section.
  - (c) When the size of the wheel or rim is known, refer to the Wheel, Rim, Flange and Lock Ring Chart (page 4).

T.S.L.‡ CROSS - REFERENCE GUIDE

HOW TO FIND A SERVICE PART NUMBER FOR A WHEEL FROM THE T.S.L. ‡

1. Locate the wheel number shown on the Truck Specification List.
2. Using the Cross-Reference below, select the service part number which corresponds to the number found on the T.S.L.

If the T.S.L. number is not available, see Page 3.

FRONT HUB T.S.L. CROSS-REFERENCE GUIDE  
HOW TO FIND A FRONT HUB SERVICE PART NUMBER FROM THE T.S.L.:

1. Locate the front hub number shown on the Truck Specification List.
2. Using the Cross-Reference below, find the correct parts list number. (Parts lists start following application chart in this section).
3. Turn to the correct parts list number and select the front hub service part number. (The parts list can also be used to select related parts.) If truck does not have a T.S.L., refer to page 2 of this section for model application.

## REAR HUB T.S.L. CROSS-REFERENCE GUIDE HOW TO FIND A REAR HUB SERVICE NUMBER FROM THE T.S.L.:

1. Locate the rear hub number shown on the Truck Specification List.
2. Using the Cross-Reference below, find the correct parts list number.  
(Parts lists follow the Application Chart in this section)
3. Turn to the correct parts list number and select the rear hub service part number. (The parts list can also be used to select related parts).

If truck does not have a T.S.L. refer to the Model Application Chart in this section

2025 CHAMBER ASSY. (FRONT BRAKE AIR)

**FRONT BRAKE CHAMBER T.S.L. † CROSS-REFERENCE GUIDE**

1. Locate the front brake chamber number shown on the Truck Specification List. (When "See Frt. Axle" is shown on the T.S.L., use the front axle part number from the T.S.L. to find the correct chamber in the chart below.)
2. Use the Cross-Reference below to find the correct chamber service part number.
3. For component parts of the chamber refer to the parts list column for parts list number
4. Parts lists are in Section 22.2

## HOW TO LOCATE FRONT BRAKE PARTS

1. Use the Front Brake T.S.L. † Cross Reference Guide (below) to find the correct brake parts list.
2. Use the Front Brake Model Application Chart (which follows the T.S.L. Chart) to find the correct brake parts list when a T.S.L. number is not available.

Where the T.S.L. says See frt. axle, the front axle number shown on the T.S.L. is listed in the guide below.

† Truck Specification List-included in Louisville-built trucks

FRONT BRAKE MODEL APPLICATION CHART

1. Determine truck series and model year.
2. When optional brake sizes are shown, determine brake size. The brake size shown is the inside diameter of the brake drum and the width of the related brake shoe lining.
3. When different axle capacities are shown for the same brake size, determine axle capacity from truck warranty plate code.
4. Determine if the brake system is hydraulic or air type and select appropriate parts list number.
5. Refer to affected parts list. Brake component parts lists appear in numerical sequence in this section following the application chart. Brake drums are not included in the parts lists. They are listed with the appropriate hub assembly under group 1104 in Section 11.
6. Refer to the appropriate section and page of the Truck Illustration Catalog when necessary for the group numbers of the required parts. Brake components are also listed by part name with their related group number in the Index at the beginning of Section 10.

**BULK HOSE and RE-USABLE FITTINGS CHART**

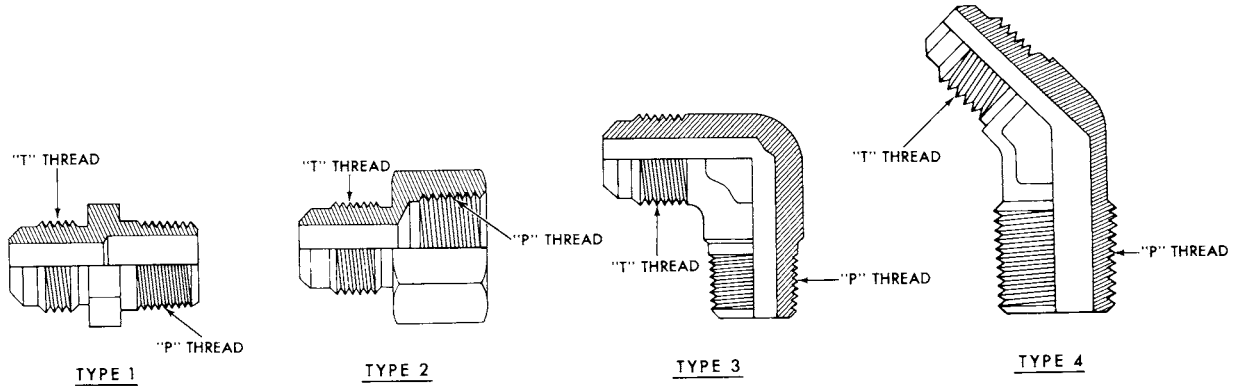

1973/Louisville-built trucks use hoses and re-usable fittings for brake lines. The Chart below may be used to make service replacements for the hoses and fittings.

1. Determine hose I.D. on truck being repaired
2. Find hose I.D. in chart below
3. Follow line containing that hose to the right to find part numbers for hose and fittings (Where more than one fitting is listed on the same line, use the hose adapter chart below to determine fitting needed.)

## HOW TO LOCATE REAR BRAKE PARTS

1. Use the Rear Brake T.S.L. †Cross Reference Guide (below) to find the correct brake parts list.
  2. Use the Rear Brake Model Application Chart (which follows this T.S.L. Chart) to find the correct brake parts list, when a T.S.L. number is not available.
- †Truck Specification List – included in Louisville built trucks

TRUCK SERIES 600/900

REAR BRAKE MODEL APPLICATION CHART

1. Determine truck series and model year.
2. When optional brake sizes are shown, determine brake size. The brake size shown is the inside diameter of the brake drum and the width of the related brake shoe lining.
3. When different axle capacities are shown for the same brake size, determine axle capacity from truck warranty plate code.
4. Determine if the brake system is hydraulic or air type and select appropriate parts list number.
5. Refer to affected parts list. Brake component parts lists appear in numerical sequence in this section following the application chart. Brake drums are not included in the parts lists. They are listed with the appropriate hub assembly under Group 1109 in Section 11.2
6. Refer to the appropriate section and page of the Truck Illustration Catalog when necessary for the basic or group numbers of the required parts. Brake components are also listed by part name with their related basic or group number in the Index at the beginning of Section 10.

**BRAKE BOOSTER and RELATED PARTS**

	Page		Page
This section incl. the following—			
A. Brake Booster T.S.L. and Identification Cross-Reference Chart	2	C. Bendix brake vacuum booster identification tag	1
B. Illustration to identify booster types	1	D. Model Application Chart	2
		E. Brake Booster Components Parts Lists	6

**HOW TO LOCATE BRAKE BOOSTERS and THEIR COMPONENTS**

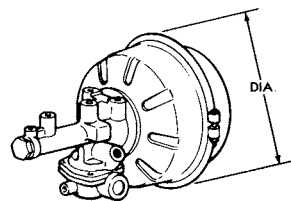

1. Use the identification tags
  - a. Ford trucks use Bendix or Midland-Ross boosters, and both types have an identification tag carrying the Ford production number and the manufacturer number. The illustration below shows how booster diameter is measured and shows the location of the identification tag on a Bendix booster.
  - b. Locate the tag on the booster and find the Ford number and manufacturer number.
  - c. Use the T.S.L. and Identification Cross-Reference Chart on page 2 to translate the Ford number or the manufacturer number into a service part number for the booster or the booster repair kit.
  - d. For component parts other than the booster (2005) or major repair kit (2309), refer to the Parts List column on page 2. These parts lists start on page 6.
2. Use the Truck Specification List (T.S.L.)
  - a. Locate the Ford production number shown on the T.S.L. in the box marked "Brake Booster Assy."
  - b. Use the T.S.L. and Identification Cross-Reference Chart on page 2 to translate the Ford production number into a service part number for the booster or the booster repair kit.
  - c. For component parts other than the booster (2005) or major repair kit (2309), refer to the parts list column on page 2. These parts lists start on page 6.
3. Use the Model Application
  - a. Determine the year and model of the truck by de-coding the truck warranty plate from the General Information Section of this Catalog.
  - b. Determine whether the unit has a single brake system (single fluid reservoir in brake master cylinder) or split brake system (two fluid reservoirs in brake master cylinder).
  - c. Use the Model Application Chart, starting on page 2 to determine the service part number of the booster needed.
  - d. For the repair kit (2309) and other component parts, it is necessary to know the Ford production number or the manufacturer number from the tag on the booster.
  - e. For the major repair kit (2309), obtain the Ford production number or manufacturer number from the booster tag, and then determine the service part number of the (2309) kit in the T.S.L. and Identification Cross-Reference Chart on page 2.
  - f. For booster components other than the repair kit (2309), obtain the Ford production number or manufacturer number from the booster tag, and then determine the parts list for these parts from the T.S.L. Identification Cross-Reference Chart on page 2. Turn to the Parts Lists, starting on page 6, and select the part needed.

**HOW TO LOCATE BRAKE MASTER CYLINDER and REPAIR KIT**

1. Use the Model Application
  - a. Determine the year and model of the truck by de-coding the Truck Warranty Plate from the General Information Section of this Catalog.
  - b. Determine whether the unit has a single brake system (single fluid reservoir in brake master cylinder) or split brake system (two fluid reservoirs in brake master cylinder).
  - c. Use the Model Application Chart, starting on page 2 to determine the service part number of the brake master cylinder needed.
  - d. The repair kit (2004) is listed in the Model Application Chart directly below the service master cylinder.
  - e. Component parts of the brake master cylinder such as cover (2162), gasket (2167), etc. will be found under their respective groups in this Catalog.

# 1980/ TRUCK SERIES 600/900

This section includes replacement parts for transmission-mounted parking brakes and transfer case-mounted brakes. Spring-operated air parking brakes are not included in this section. For these parking brakes, refer to headings "Brake Systems" and "Brake Air Chamber" in the Illustration index for Illustration Section 10 to obtain group numbers.

### HOW TO USE PARKING BRAKE PARTS LISTS

1. Find the truck model in the model application chart below. (Example: B600)
2. Locate (in the chart below) the transmission used on the unit being repaired. (Example: 5 speed Clark 282V-  
shown in chart as "5 C 280 series")
3. Determine the size parking brake used on the truck (where necessary) (Example: 10" x 3")
4. Determine the year (and/or serial number) of the truck.
5. Read across to find the Parts List number in which the brake parts are listed. (Example: 9A)
6. Turn to the Parts List and select the part needed. (Parts Lists follow the Application Chart)

FRONT AXLE MODEL APPLICATION CHART

How to locate front axle parts using this chart:

1. Find truck series in first column (Truck series)
2. Find year of truck in second column (Year)
3. Find front axle capacity in fourth column (Front axle capacity-lbs.)  
When front axle capacity is not known, use one of the following methods to determine it:
  - a. Refer to the Truck Specification List (see previous page), if available.
  - b. Refer to the Truck Warranty Plate for the front axle code (See Front Axle Codes in the General Information Section).
4. Note proper front axle parts list in fifth column (Front axle parts list)  
EXAMPLE: 30.3A means Section 30.3 column A
5. Turn to front axle parts list shown in fifth column to locate part needed.  
Parts are listed in numerical order. If the basic number is not known, refer to the appropriate illustration, or to the alphabetical index.

## 3504 GEAR ASSY. (STEERING)

## A. HOW TO FIND COMPLETE STEERING GEAR ASSEMBLY PART NUMBER

1. Using the Truck Specification List (T.S.L.)—  
Determine the steering gear assembly part number from the T.S.L. and refer to the T.S.L. Cross Reference Guide (page 2) to find the correct service part number.
2. Using Truck Series year and front axle capacity—  
Refer to model application chart (page 2) to find the correct steering gear.
3. Using the Identification Tag—  
Refer to the "Identification Tag" column in the model application chart (page 2) to find the correct service part number.

## B. HOW TO FIND THE PART NUMBER FOR A COMPONENT PART OF A STEERING GEAR

1. Use one of the methods explained above to determine the steering gear parts list number.
2. Find the parts list number for that steering gear in the T.S.L. Cross-Reference Guide or the Model Application Chart.
3. Turn to the Parts List (starting on page 3) and find the component needed.
4. If the basic number is not known, refer to the illustration reference given or the Alphabetical Index.

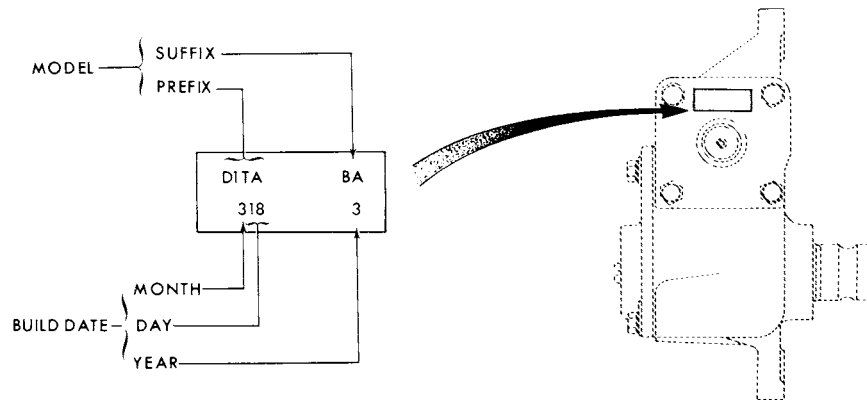

## STEERING GEAR IDENTIFICATION TAG

The illustration below shows the general location of the gear identification tag, which gives the gear assembly number, prefix and suffix.

Basic gear assembly numbers are usually the following—

3N503 Integral type power steering gear. (example—Ross HF-54 and HFB-64 gears)

3504 Manual or Power assist gear. (example—Ross 375, 408 and 504 gears)

P-10225

**3A540 CYLINDER ASSY. (POWER STEERING DRAG LINK)**  
**HOW TO FIND POWER STEERING CYLINDER ASSEMBLIES AND COMPONENTS**

A - BY IDENTIFICATION CHART (see below)

1. Identifications are listed in numerical and alphabetical sequence.
2. Use the identification number to find a service part number for a cylinder assy. or to find a parts list number for the components of the cylinder.
3. As an additional aid, the page number of the cylinder illustration is given.

B - BY APPLICATION CHART (see below)

1. Find the required truck model, year and front axle capacity in the application chart.
2. To replace a cylinder assy., order the number shown in the PART NUMBER column. To repair a cylinder assembly, refer to the Parts List for component parts.
3. As an additional aid, the page numbers of the cylinder illustration and the power steering system illustrations are given.

**POWER STEERING HOSE REPLACEMENT CHART**

1. Hose assembly part numbers are listed in part number sequence.
2. Keep old hose as a guide for length and shape.
3. Use details shown to assembly new hose assembly.
4. Fittings used for the replacement hoses are the reusable type.
5. Refer to Power Steering Hose Replacement Details Chart on page 13 of this section. for description of the replacing parts.

HOW TO FIND POWER STEERING PUMP and COMPONENTS

- A. Using the Truck Specification List (T.S.L.) or Identification Number
1. Locate the power steering pump number shown on the T.S.L.
  2. Find the power steering pump number located on the assembly.  
Example: All Eaton pumps have the assembly number stamped on the relief valve cap.
  3. Use the Cross Reference below to find the parts list which contains service parts for that pump.
  4. When T.S.L. or Identification Number is not available, refer to the Model Application Chart following the Cross Reference Guide.
- B. Using the Model Application Chart
1. Refer to the Application Chart by establishing vehicle year, model, engine and front axle capacity.
  2. Refer to that parts list which is shown for the required application.
  3. When basic number is not known, refer to the Illustration references shown on the chart or to the Alphabetical Index.

### REAR AXLES and RELATED PARTS

#### HOW TO IDENTIFY REAR AXLE PARTS.

**1. BY USING THE WARRANTY PLATE CODE.**

Refer to page 109 of this section. Codes are arranged in alphabetical and numerical sequence.

**2. BY USING THE APPLICATION CHART.**

Refer to page 116 of this section.

**3. BY USING THE AXLE TAG or DIFFERENTIAL CARRIER IDENTIFICATION NUMBER.**

Refer to page 119 of this section. Illustrations showing the location of identification numbers (stampings and tags) appear on page 2 of this section.

**4. BY USING THE TRUCK SPECIFICATION LIST (T.S.L.).**

Refer to page 3 of this section.

**5. BY USING REAR AXLE ILLUSTRATIONS.**

a. Parts illustrations for rear axle components are published in Illustration Section 40 of the Truck Illustrations Catalog. Form FP 8473-B. For appropriate page number, see the Index at the beginning of Illustration Section 40, or refer to Truck Rear Axle Application Chart on page 116 of this section.

b. Find the basic group number from the illustration.

c. Use one of the methods above to determine the rear axle parts list number in Section 40.1.

d. Refer to the group in the catalog. Determine the part number needed from that group or follow cross-references to other groups to determine the number needed.

**6. BY USING THE ALPHABETICAL INDEX.**

a. An index listed alphabetically by part name showing the related basic or group number for rear axle parts is located at the beginning of this catalog.

b. Use the index to find the group number of the part.

c. Use one of the methods above to determine the rear axle parts list number in Section 40.1.

d. Turn to the proper parts list and select the part in the group desired.

**7. BY USING CHARTS SHOWING DIMENSIONS or MARKINGS.**

Refer to basic groups 4209, 4234, 4851 and 4859 in Sections 41 and 48 to identify these parts.

#### 4 WHEEL DRIVE FRONT AXLES

Parts lists and appropriate information for identifying the parts lists for 4 Wheel Drive Front Axles are included in Section 30, page 1.

#### REAR AXLE SECTION ARRANGEMENT

The sections in the rear axle area are arranged in the following order. 40, 40.1 and 41.

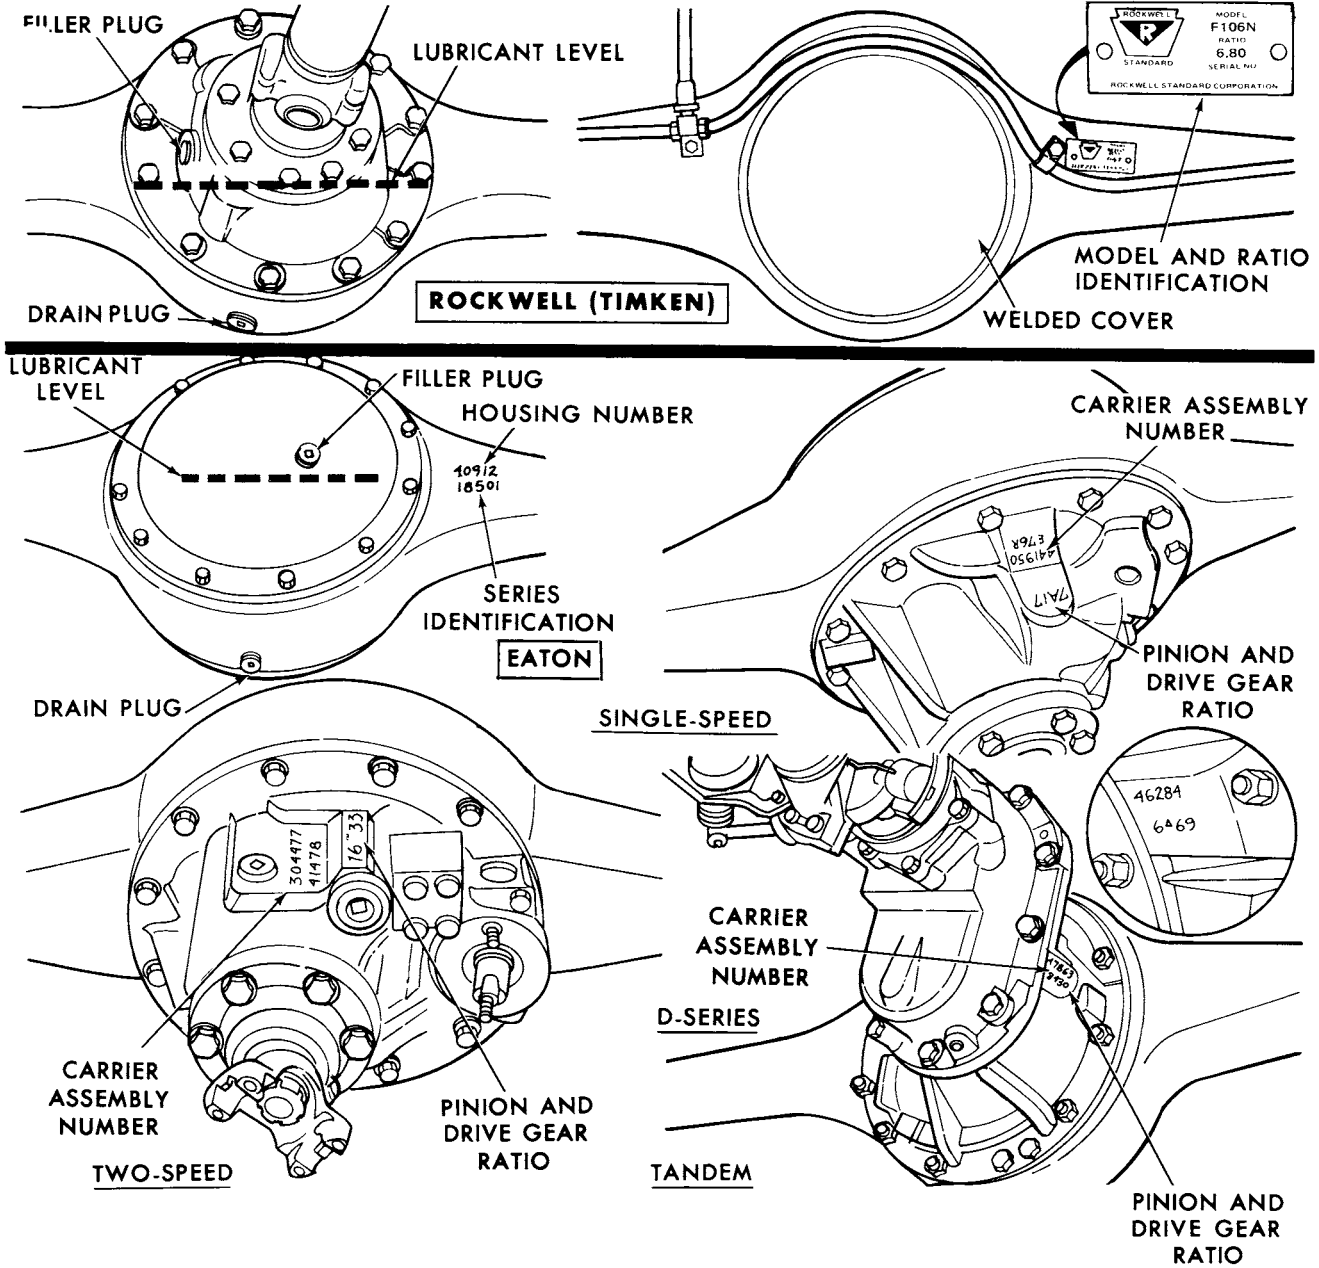

Select the appropriate parts list number by using one of the above methods. Refer to the affected parts list in Section 40.1 and determine part number of required parts. When available, complete Rear Axle Assemblies and Differential Carrier Assemblies are listed on page 138 thru 247 of this section.

# 1980/ TRUCK SERIES 600/900

## REAR AXLE IDENTIFICATION NUMBERS

Eaton and Rockwell (Timken) axles use identification numbers on the carrier or housing to help locate parts. Refer to page 119 of this section for a cross-reference from identification numbers to axle parts lists.

### REAR AXLE IDENTIFICATION CHART

WHEN USING THE REAR AXLE IDENTIFICATION CHART, THE TRUCK MODEL AND YEAR SHOULD BE VERIFIED FIRST, AS THE MANUFACTURER'S AXLE MODEL AND CARRIER IDENTIFICATION NUMBERS MAY BE THE SAME FOR TWO OR MORE AXLES.

1980/  
TRUCK SERIES 600/900

REAR AXLE T.S.L. † CROSS-REFERENCE GUIDE

1. Find the rear axle assembly number shown on the Truck Specification List (T.S.L.).
  2. Use the Cross-Reference below to find the proper rear axle parts list number.
  3. Turn to the rear axle parts list (in Section 40.1) and select the component part needed.
- Note. Complete axle assemblies and differential carrier assemblies which are available for service are listed by parts list number on page 138 of this section.
