## FORD ENGINE CALIBRATIONS DETERMINING VEHICLE CALIBRATION

**IMPORTANT NOTE:** To determine the CALIBRATION CODE on 1981 and early 1982 production engines, follow steps 1 through 4 as shown and described in Items A and B. To do this, you will be required to look at the Vehicle Emission Decal to determine Steps (1) and (2). For Steps (3) and (4) look at the Calibration Label for

the additional information you'll need. Then follow instructions in steps 1 through 4 listed below. For later production 1982 models you will only need to look at the CALIBRATION CODE Label as shown in Item C, Step 1A.

### ALL 1981 AND EARLY 1982 MODELS

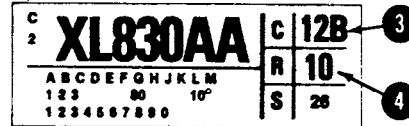

Item A

CODE LABEL  
— ALL OTHER  
1981 AND EARLY  
1982 ENGINES

### 1981-82 Code Label Early 1982 Models

Item B  
(See  
Example  
Below)

NOTE: Some calibrations are carried over from prior model years. If you cannot locate calibration number using "2" prefix, check "1", "0", "9", "8", "7", or "5" prefixes.

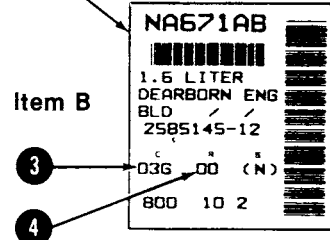

- 1 DETERMINE ENGINE DISPLACEMENT FROM EMISSION CONTROL DECAL\*\*  
... ENTER IN BLANK "A" OF EXAMPLE SHOWN BELOW.
- 2 DETERMINE VEHICLE MODEL YEAR FROM EMISSION CONTROL DECAL\*\*  
... ENTER LAST DIGIT IN BLANK "B": SEE EXAMPLE BELOW.
- 3 DETERMINE CALIBRATION BASE NUMBER FROM ENGINE CODE LABEL\*\*  
... ENTER NUMBERS AND LETTERS IN BLANK "C".
- 4 DETERMINE REVISION LEVEL FROM ENGINE CODE LABEL\*  
... ENTER IN BLANK "D".

(A) (B) (C) (D)  
EXAMPLE: ENGINE: 3.3L (200 CID) CALIBRATION 2 — 12B — R10

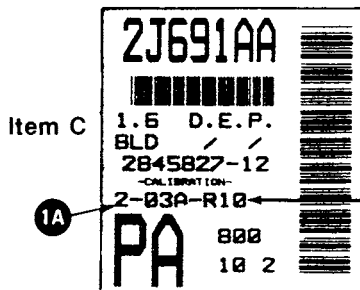

### 1981-82 Code Label Early 1982 Models

ENGINE CODE LABEL  
1.6L ENGINE ONLY

Item B

### LATE PRODUCTION 1982 (AND LATER) MODELS

Item C

READ THIS AS 2-3A-R10

- \* Located on engine valve cover. (Yellow or White)
- \*\* Located on engine valve cover, radiator support bracket, underside of hood or fresh air inlet tube (Gold or Silver), or windshield washer bottle.
- \*\*\* Located on Timing Chain Cover.

**IMPORTANT NOTE:** These CALIBRATION DECALS affixed to late 1982 production engines, contain all the information you'll need to determine the correct engine calibration. Depending upon the engine displacement, check by looking at Step 1A. You *do not* have to refer to the Vehicle Emission Decal for details.

Item C

READ THIS AS 1-18U-R0

1A

Once the calibration and revision level are determined, refer to the "Calibration Number to Parts List Cross Reference Chart" on page 2. Calibration numbers are also shown by vehicle and engine application in the "Model Application to Parts List Cross Reference Chart" on page 3. Find the corresponding 1980/ calibration number and the part list number. For detailed part number information, refer to the appropriate Parts List No. in Section 93B.

Example: If the calibration number and revision level shown on the engine code label are "0-018" and "R0", the Calibration Parts List No. is 1.

NOTE: Calibration codes are listed in computer language.  
Thus, Read: 00 as 0,  
03 as 3, etc.

P-17955

9D475 VALVE ASSY. (EXHAUST GAS RECIRCULATION)

To select the correct EGR valve by knowing the identification number only:

- Check the EGR valve, taken from the vehicle, for an identification part number.
- Refer to the Identification Chart below.
- Find the EGR valve identification part number (sequenced numerically) and find the service part number in the adjacent column.

For example:

The service part number for EGR valve identified E0BE 9D475-B1A or E0BE 9D475-B2A is E0BZ 9D475-B

For Model Application, refer to Calibration Parts Lists in Section 93A.

**9510 CARBURETOR ASSY.**

**HOW TO IDENTIFY CARBURETORS and RELATED PARTS**

To facilitate the identification of parts for a specific carburetor, parts lists or bills of material are provided in Section 95.1 and up of this catalog for each carburetor assembly. It is necessary first to identify the carburetor assembly per the instructions that follow.

Carburetors can be identified by the stamping number shown on the carburetor or on a metal tag attached to the carburetor.

Each carburetor for 1980/ models has an identification tag. An illustration and explanation of the carburetor identification tags are shown on Page 2 of this section.

If either the tag or stamping identification number is known, the related carburetor and carburetor parts list numbers can be determined from the Chart beginning on Page 2 of this section.

Carburetors and related parts lists are also identified by the Engine Calibration number Cross Reference Chart and by Year, Model, and Engine in the Model Application Cross Reference Chart. These charts are shown in Section 93A.

Carburetor illustrations are shown in Illustration Section 95 of Form FP 8473-B.

Parts lists are grouped by type and engine and each group of related carburetor parts lists is shown in a separate section. The section number can readily be identified with the carburetor parts list numbers as shown in the following example:

Carburetor Type	No. of Cyl.	Engine Liters	Parts List Number	Catalog Section No.
Holley 2/B	8	6.1	1A, 1B	95.1
Holley 4/B	8	7.8,8.8	3A, 3B, 3C	95.3

For ready reference, kit part numbers are shown with the carburetor identification guide. A listing of components for each kit is shown in Section 95A.

Refer to the Index at the beginning of Section 95A for page number of service kit.

Carburetor attaching parts are shown at the beginning of their respective parts lists.

To identify the parts for a specific carburetor it is only necessary to refer to the related parts list and parts illustration.

An Alphabetical Index showing a cross-reference between noun description and Basic Group number is located at the beginning of this catalog.

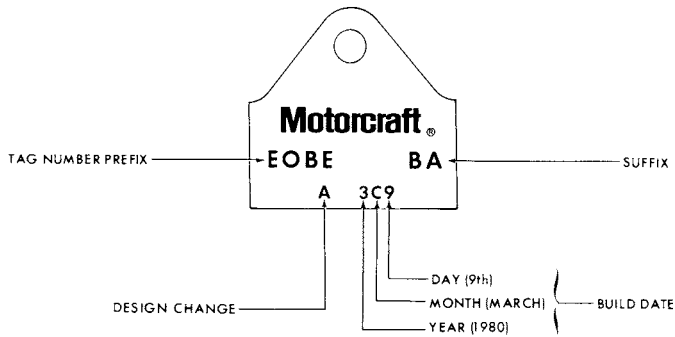

**IMPORTANT: ALWAYS FURNISH APPROPRIATE WARRANTY PLATE INFORMATION and DSO NUMBER  
IF APPLICABLE WHEN ORDERING PARTS NOT LISTED IN THE CATALOG.**

## CARBURETOR KIT COMPONENTS

Instructions for identifying Carburetor Assemblies and their related Parts List Numbers are shown at the beginning of Section 95.

For ready reference, kit part numbers are shown in the carburetor identification chart-Section 95.

Included in Section 95A is a listing of components for each kit.

Parts Lists for new kits will be added at the end of this section, irrespective of part number.

Always refer to the following Index for page numbers on which components are listed.

10A313 ALTERNATOR MOUNTING PARTS

Alternator mounting parts are listed in chart form following the illustration below. Refer to the illustration to determine the name of the part required. Refer to the chart to select the appropriate part number. The chart is listed by year, series, engine and alternator make and amperage.

Attaching parts such as bolts, nuts, etc. are listed by code number. A listing of the code numbers and their corresponding part numbers and descriptions appears at the end of the chart.

ALTERNATOR IDENTIFICATION and/or T.S.L. CROSS REFERENCE GUIDE

HOW TO FIND ALTERNATORS and COMPONENTS

- |  |  |
|--|--|
| <p>By IDENTIFICATION on ALTERNATOR:</p> <ol style="list-style-type: none"> <li>1. Locate marking (on alternator housing).</li> <li>2. Check marking listed under Alternator Identification Chart below to find part number of service alternator, pulley, fan &amp; spacer.</li> </ol> | <p>By MODEL IDENTIFICATION:</p> <ol style="list-style-type: none"> <li>1. Refer to Alternator Application Chart beginning on page 18</li> <li>2. Refer to appropriate Year, Model and Engine.</li> </ol> |
|--|--|

By IDENTIFICATION on TRUCK SPECIFICATION LIST: †

† Included with all trucks built at Louisville

1. Locate Alternator number shown on Truck Specification List.
2. Check Alternator number against Identification numbers listed below to find part numbers of service Alternator, Pulley, Fan & Spacer.
3. Select and refer to appropriate Parts List Section and Number.
4. If basic number is not known refer to Illustration Page shown, or to Index following the General Information Section of this Catalog.
5. Select part number shown for affected Parts List. If more than one part number is shown refer to Description and Restrictions for clarification.
6. Quantity of parts shown in columns A, B or C etc.
7. Parts are listed numerically.

IDENTIFICATION EXAMPLE: D8ZF 10300-EA is listed in Parts List Section 103.1 Column A.

MODEL APPLICATION EXAMPLE: 1980 F600 uses 40 amp. Alternator (D9ZZ 10346-A). Internal parts for this Alternator are listed in Parts List Section 103.1 Column 1C.

TRUCK SPECIFICATION LISTS EXAMPLE: D8ZF 10300-EA appears on a Truck Specification List. The service alternator for this number is D9ZZ 10346-A and internal parts for this Alternator are listed in Parts List Section 103.1 Column 1A.

10346 ALTERNATOR ASSY. — Cont'd

**APPLICATION CHART**

(Also see ALTERNATOR IDENTIFICATION CHART on pages 15 thru 17 of this Section)

Determine year, model, engine, make of alternator and amperage or identification.  
Find service Alternator as well as Voltage Regulator in adjacent column. Parts are listed in order of Make and Amperage.

**APPLICATION CHART**

10732 BATTERY MOUNTING PARTS

Battery mounting parts are listed in chart form following the illustrations below. Refer to the illustration to determine the name of the part required. Refer to the chart to select appropriate part number. The chart is listed by year, model and amperage of battery.

Attaching parts such as bolts, nuts, etc. are listed by code number. A listing of code numbers and their corresponding part numbers and descriptions appears at the end of the chart.

\*NOT INCLUDED IN CHART-REFER TO GROUP FOR COMPLETE PART NUMBER

11001-2 STARTER MOTOR

HOW TO FIND STARTERS and COMPONENTS

By IDENTIFICATION:

1. Refer to Identification chart below.
2. Check marking (on starter housing) against Identification numbers.
3. Select and refer to appropriate Parts List Section and Number.
4. If basic number is not known refer to Illustration Page shown, or to the Alphabetical Index which follows the General Information section of this catalog.
5. Select part number shown for affected Parts List. If more than one part number is shown refer to Description and Restrictions for clarification.
6. Quantity of parts shown in columns A, B or C etc.
7. Parts are listed numerically.

By MODEL APPLICATION:

1. Refer to Model Application Chart beginning on page 4.
2. Refer to appropriate Year, Model and Engine.

Identification Example D9HT 11001-AA is listed in Parts List Section 110.1, Column A.

Model Application Example 1980 F600 (8 cylinder Gas) uses starter D9HZ 11002-A. Internal parts for this starter are listed in Parts List Section 110.1, column A.

TRUCK SERIES 600/900**

**12A091 VALVE ASSY. (DISTRIBUTOR VACUUM CONTROL)**—Also refer to group 12A208

To select the correct VACUUM CONTROL valve by knowing the identification number only:

- Check the VACUUM CONTROL valve, taken from the vehicle, for an identification part number.
- Refer to the Identification Chart below.
- Find the VACUUM CONTROL valve identification part number (sequenced numerically) and find the service part number in the adjacent column.

For example:

The service part number for VACUUM CONTROL valve identified D5TE-BA is D5TZ 12A091-A

For Model Application, refer to Calibration Parts Lists in Section 93A.

12127 DISTRIBUTOR ASSY.

HOW TO FIND DISTRIBUTORS and COMPONENTS

To find Distributor Parts:

By IDENTIFICATION:

- (1) Refer to Identification Chart below.
- (2) Check marking (on distributor) against identification numbers to determine part numbers of service distributor, adaptor, cap, diaphragm assembly and rotor.
- (3) If group number is not known refer to illustration page shown, or to the Alphabetical Index which follows the General Information Section of this catalog.

By MODEL APPLICATION:

- (1) For model application, refer to Calibration Parts Lists in Section 93A.

Serviceable distributor components which do not show in the chart below are cataloged in the normal group sequence in Section 120 providing they do not affect distributor calibration.

Those parts which do affect distributor calibration are available only to authorized rebuilders.

<b>12405 SPARK PLUG ASSY.</b>						
<b>Note:</b> Important - Canadian regulations require that vehicles and other devices (other than aircraft) equipped with internal combustion engines using spark ignition systems and manufactured in or imported into Canada on or after September 1, 1976 be operated in conformance with restrictions on radio frequency interference. Use of non-resistor or non-inductive type spark plugs may cause such vehicles or devices to be out of compliance with these regulations.

WIRING MARKING or TAG NUMBER TO SERVICE WIRING PART NUMBER GUIDE

The purpose of this guide is to facilitate the identification of the Service Wiring Part Number. The chart that follows lists the Wiring Markings or Tag Numbers in numerical sequence. For many vehicles the Service Wiring Part Number will be the same as the Wiring Marking or Tag Number. This type of replacement will cause little or no installation problems. However, when the Service Wiring differs from the Wiring Marking or Tag Number it will be necessary to match lead wires and to tape up those lead wires which are not required. This is necessary when the Service Wiring has a more general application than the original wiring installed by the factory. Following this guide chart, Service Wiring Part Numbers are listed by model year and vehicle usage which will permit the identification of replacement wiring when the wiring identification marking or tag number is not known.

IMPORTANT Always furnish appropriate warranty or rating plate information and DSO number if applicable when ordering parts not listed in the catalog.

IDENTIFICATION CHART

Wiring Marking or Tag No.	Service Wiring Part Number	Wiring Marking or Tag No.	Service Wiring Part Number

14300 CABLE ASSY. (BATTERY UNIVERSAL TYPE)

P. 9098

Battery cable terminals (battery end) are universal and may be used on either the positive or negative battery post. Battery cable length is determined by distance between hole centers.

**14305 WIRING ASSY. (ALTERNATOR TO VOLTAGE REGULATOR)**

**WIRING MARKING or TAG NUMBER TO SERVICE WIRING PART NUMBER GUIDE**

The purpose of this guide is to facilitate the identification of the Service Wiring Part Number. The chart that follows lists the Wiring Markings or Tag Numbers in numerical sequence. For many vehicles the Service Wiring Part Number will be the same as the Wiring Marking or Tag Number. This type of replacement will cause little or no installation problems. However, when the Service Wiring differs from the Wiring Marking or Tag Number it will be necessary to match lead wires and to tape up those lead wires which are not required. This is necessary when the Service Wiring has a more general application than the original wiring installed by the factory. Following this guide chart, Service Wiring Part Numbers are listed by model year and vehicle usage which will permit the identification of replacement wiring when the wiring identification marking or tag number is not known.

**IDENTIFICATION CHART**

**14398 WIRING ASSY. (DASH PANEL TO ENGINE)  
WIRING IDENTIFICATION and/or T.S.L. CROSS-REFERENCE GUIDE**

1. How to use the Truck Specification List (T.S.L.) to locate a dash panel-to-engine wiring service part number:
  - a. Locate the dash panel-to-engine wiring part number shown on the Truck Specification List.
  - b. Use the Cross-Reference below to find the correct service part number. NOTE: when the service wiring differs from the original wiring, it will be necessary to tape up unused lead wires.
  
2. How to use tag numbers or markings to locate a dash panel-to-engine wiring service part number:
  - a. Locate a tag number or marking on the dash panel-to-engine wiring of the truck.
  - b. Use the Cross-Reference below to find the correct service part number. NOTE: when the service wiring differs from the original wiring, it will be necessary to tape up the unused lead wires.
  
3. If a T.S.L. or marking is not available, obtain the truck model and year and refer to the model application listing below to locate the correct wiring part number.

**IMPORTANT** Always furnish appropriate warranty or rating plate information and DSO number if applicable when ordering parts not listed in the catalog.

TRUCK SERIES 600/900

14401 WIRING ASSY. (INSTRUMENT PANEL TO DASH PANEL)  
WIRING IDENTIFICATION and/or T.S.L. CROSS-REFERENCE GUIDE

1. How to use the Truck Specification List (T.S.L.) to locate a cowl wiring service part number:

- a. Locate the cowl wiring part number shown on the Truck Specification List.
- b. Use the Cross-Reference below to find the correct service part number.

NOTE: When the service wiring differs from the original wiring, it will be necessary to tape up unused lead wires.

2. How to use tag numbers or markings to locate a cowl wiring service part number:

- a. Locate a tag number or marking on the cowl wiring of the truck.
- b. Use the Cross-Reference below to find the correct service number.

NOTE: When the service wiring differs from the original wiring, it will be necessary to tape up unused lead wires.

3. If a T.S.L. or marking is not available, obtain the truck model and year and refer to the model application chart which follows the Identification Chart.

**IMPORTANT**

Always furnish appropriate warranty or rating plate information and DSO number if applicable when ordering parts not listed in the catalog.

YEAR	MODEL/RESTRICTIONS	ENGINE		PART NUMBER	DESCRIPTION	QTY.
		CYL.	C.I.D. (C.C.D.)			
<b>14401 WIRING ASSY. (INSTRUMENT PANEL TO DASH PANEL)</b>						
80	F600/800 (81) -- w/hydraulic brakes	6&8	All	★ E0HZ 14401-T	Use w/ammeter and oil pressure warning lights and A/T, A/C, dual fuel tanks or mirror marker lamps	1
80	F600/800(81) -- w/single hydraulic brakes-M/T	6&8	All		Use w/ammeter and oil pressure warning lights w/deluxe heater, dual fuel tanks w/o lighted O/S mirror marker lamps	1
81	F600/800 (81) -- w/split hydraulic brakes "Before 6/81"	6&8	All	★ E1HZ 14401-K	Use w/ammeter and oil pressure warning lights and A/T, A/C, dual fuel tanks or mirror marker lamps	1
81/82	F600/800(81) -- w/split hydraulic brakes "From 6/81 to 12/81"	6&8	All	★ E1HZ 14401-T	Use w/ammeter and oil pressure warning lights and A/T, A/C, dual fuel tanks or mirror marker lamps	1
82	F600/800(81) -- w/split hydraulic brakes "From 12/81"	6&8	All	★ E2HZ 14401-E	Use w/ammeter and oil pressure warning lights and A/T, A/C, dual fuel tanks or mirror marker lamps	1
80	F600/800(81) -- w/air brakes	6&8	All	★ E0HZ 14401-U	Use w/ammeter and oil pressure warning lights	1
81	F600/800(81) -- w/air brakes "Before 6/81"	6&8	All	★ E1HZ 14401-L	Use w/ammeter and oil pressure warning lights	1
81/82	F600/800(81) -- w/air brakes "From 6/81 to 12/81"	6&8	All	★ E1HZ 14401-U	Use w/ammeter and oil pressure warning lights	1
82	F600/800(81) -- w/air brakes "From 12/81"	6&8	All	★ E2HZ 14401-F	Use w/ammeter and oil pressure warning lights	1
80	F600/800(81) -- w/hydraulic brakes	6&8	All	★ E0HZ 14401-V	Use w/ammeter and oil pressure gauges	1
81	F600/800(81) -- w/hydraulic brakes "Before 6/81"	6&8	All	E1HZ 14401-M	Use w/ammeter and oil pressure gauges	1
81/82	F600/800(81) -- w/hydraulic brakes "From 6/81 to 12/81"	6&8	All	E1HZ 14401-V	Use w/ammeter and oil pressure gauges	1
82	F600/800(81) -- w/hydraulic brakes "From 12/81"	6&8	All	E2HZ 14401-G	Use w/ammeter and oil pressure gauges	1
80	F600/800(81) -- w/air brakes	6&8	All	★ E0HZ 14401-W	Use w/ammeter and oil pressure gauges	1
81	F600/800(81) -- w/air brakes "Before 6/81"	6&8	All	★ E1HZ 14401-N	Use w/ammeter and oil pressure gauges	1
81/82	F600/800(81) -- w/air brakes "From 6/81 to 12/81"	6&8	All	★ E1HZ 14401-W	Use w/ammeter and oil pressure gauges	1
82	F600/800(81) -- w/air brakes "From 12/81"	6&8	All	★ E2HZ 14401-H	Use w/ammeter and oil pressure gauges	1
80	F600/800(81) -- w/single hydraulic brakes	6&8	All	★ E0HZ 14401-Z	Use w/ammeter and oil pressure warning lights, w/o, A/T, A/C, dual fuel tanks mirror marker lamps	1
81	F600/800(81) -- w/single hydraulic brakes "Before 6/81"	6&8	All	★ E1HZ 14401-R	Use w/ammeter and oil pressure warning lights w/o A/T, A/C, dual fuel tanks or mirror marker lamps	1
81/82	F600/800(81) -- w/single hydraulic brakes "From 6/81 to 12/81"	6&8	All	★ E1HZ 14401-X	Use w/ammeter and oil pressure warning lights w/o A/T, A/C, dual fuel tanks or mirror marker lamps	1
82	F600/800(81) -- w/single hydraulic brakes "From 12/81"	6&8	All	★ E2HZ 14401-J	Use w/ammeter and oil pressure warning lights w/o A/T, A/C dual fuel tanks or mirror marker lamps	1
80/81	B-F600/800 (84) -- w/hydraulic brakes "Before 6/81"	6&8	All	E0HZ 14401-X		1
81/82	B-F600/800(84) -- w/hydraulic brakes "From 6/81 to 12/81"	6&8	All	★ E1HZ 14401-Z		1
82	B-F600/800(84) -- w/hydraulic brakes "From 12/81"	6&8	All	★ E2HZ 14401-L		1

## 1980/ TRUCK SERIES 600/900

### 14405 WIRING ASSY. (REAR LAMP)

#### WIRING MARKING or TAG NUMBER TO SERVICE WIRING PART NUMBER GUIDE

The purpose of this guide is to facilitate the identification of the Service Wiring Part Number. The chart that follows lists in numerical sequence the Wiring Markings or Tag Numbers. For many vehicles the Service Wiring Part Number will be the same as the Wiring Marking or Tag Part Number. This type of replacement will cause little or no installation problems. However, when the Service Wiring differs from the Wiring Marking or Tag Number it will be necessary to match lead wires and to tape up those lead wires which are not required. This is necessary when the Service Wiring has a more general application than the original wiring installed by the factory.

Following this guide chart, Service Wiring Part Numbers are listed by model year and vehicle usage which will permit the identification of replacement wiring when the wiring identification marking or tag number is not known.

### IDENTIFICATION CHART

(Arranged according to Identification Number)

17294 ADAPTER (SPEEDOMETER and TACHOMETER)

**HOW TO FIND SPEEDOMETER and TACHOMETER ADAPTERS**

There are three ways of determining the part number of a speedometer or tachometer adapter.

BY PHYSICAL SHAPE, IDENTIFICATION or BY APPLICATION

BY PHYSICAL SHAPE

YOU MUST KNOW-            Physical shape  
   Ratio

BY IDENTIFICATION

YOU MUST KNOW-            Identification number

EXAMPLE

Physical shape conforms to-  
TYPE-9A  
RATIO-1.11  
IDENTIFICATION NUMBER-D2TA 17294-AA or 777-AL  
PART NUMBER listed is-D2TZ 17294-A

BY APPLICATION

SPEEDOMETER ADAPTER

TACHOMETER ADAPTER

YOU MUST KNOW-            Year  
   Model  
   Transmission  
   Ratio  
   Single or Two Speed Axle

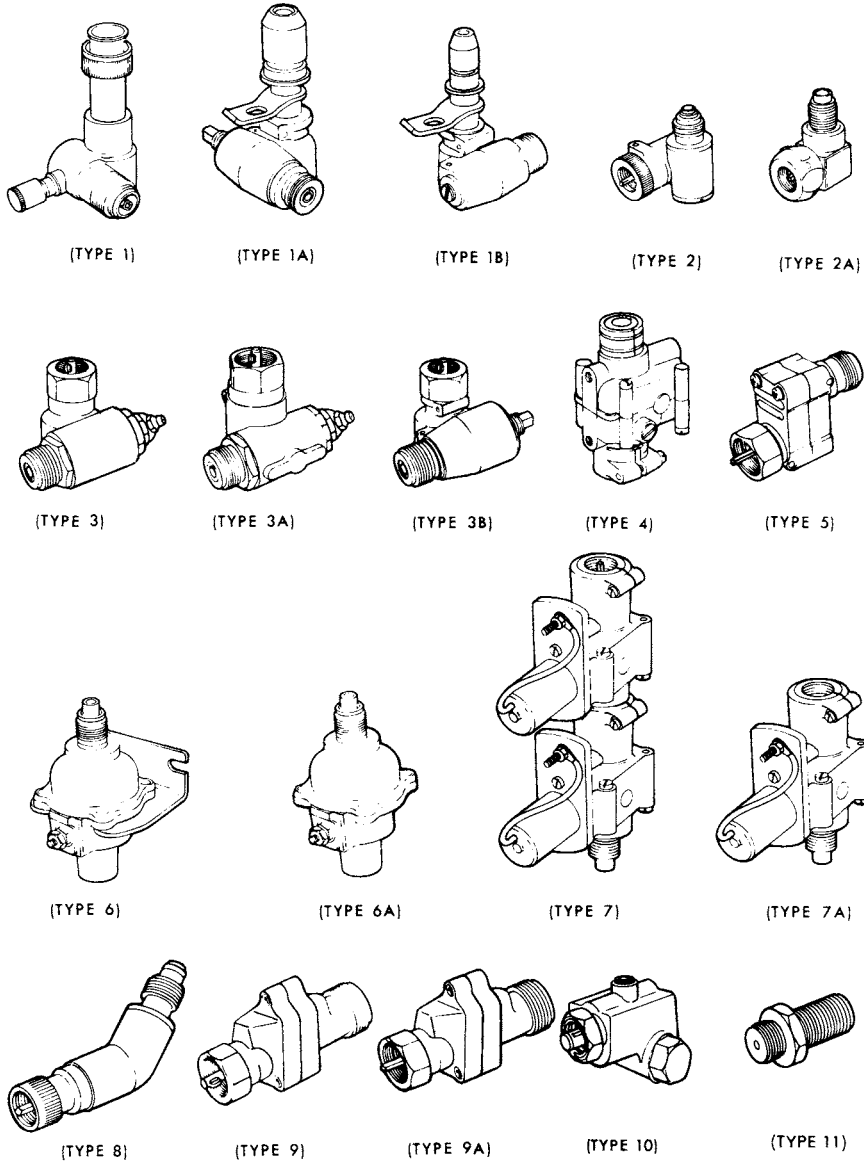

Year  
Model  
Engine  
Ratio  
Location

EXAMPLE

YEAR-1980  
MODEL-LN700  
TRANSMISSION-AT-540  
RATIO-1.11 to 1  
SINGLE or TWO SPEED AXLE-Single  
PART NUMBER listed is-D2TZ 17294-A

YEAR-1980  
MODEL-L900 -- line haul instrument panel  
ENGINE-Detroit 8V-71  
RATIO-1.05 to 1  
LOCATION-Located on cowl  
PART NUMBER listed is-D0HZ 17294-D

1980/  
TRUCK SERIES 600/900

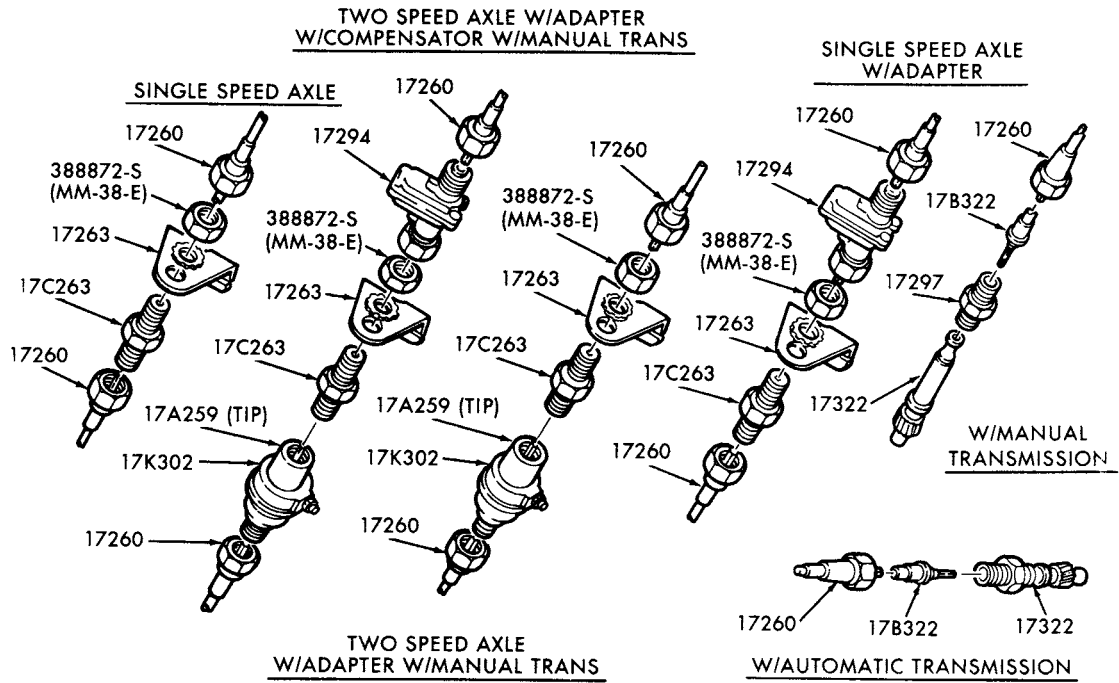

NOTE: REFER TO GROUP 17A259 FOR DRIVE KEY REPLACEMENT

P-10684

● Refer to 17A259 for drive key replacement

17285-17322 SPEEDOMETER GEARS (DRIVE and/or DRIVEN)

---

A. HOW TO FIND MECHANICAL SPEEDOMETER DRIVE and DRIVEN GEAR PART NUMBERS

There are two ways of determining the part number of a speedometer drive or driven gear.

BY IDENTIFICATION or BY APPLICATION

BY IDENTIFICATION

YOU MUST KNOW- Physical shape  
Number of teeth  
Identification number - Listed on Truck Specification List (T.S.L.) or stamped on physical part

EXAMPLE

DRIVEN GEAR (17322)  
(PAGE 2)

Physical shape conforms to-  
TYPE-7  
IDENTIFICATION NUMBER-  
EOHT-17322-BRA  
NUMBER OF TEETH-16  
PART NUMBER listed is-E0HZ 17322-BR

DRIVE GEAR (17285)  
(PAGE 5)

Physical shape conforms to-  
TYPE-9  
IDENTIFICATION NUMBER-  
EOHT-17285-AH  
NUMBER OF TEETH-6  
PART NUMBER listed is-E0HZ 17285-AH

BY APPLICATION

YOU MUST KNOW- Year  
Transmission  
Rear axle Ratio  
Tire Size

EXAMPLE

YEAR-  
TRANSMISSION-  
REAR AXLE RATIO-  
TIRE SIZE-

1980  
Fuller RT-610  
5.83 to 1  
11 x 22

DRIVE GEAR part number listed is E0HZ 17285-AH

DRIVEN GEAR part number listed is E0HZ 17322-BR

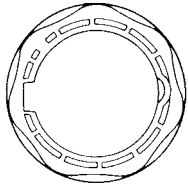

B. HOW TO FIND ELECTRONIC SPEEDOMETER COMPONENTS

1. FOR ROTOR GEARS INSIDE THE TRANSMISSIONS  
REFER TO BASIC GROUP 17385 AT THE END  
OF THIS SECTION.
  2. FOR SENSORS, REFER TO GROUP 17B384 IN  
SECTION 170.
  3. FOR SPEEDOMETER DIALS REFER TO GROUPS 17255.

17322 SPEEDOMETER GEARS (DRIVEN)

P-10682

## 1980/ TRUCK SERIES 600/900

### 17322 SPEEDOMETER GEAR (DRIVEN)

1. Locate gears by using the truck specification list (T.S.L.)
  - a. Find the part number of the speedometer driving gear or speedometer driven gear as listed on the T.S.L.
  - b. Use the T.S.L. Cross-reference Guide below to find the gear service part numbers needed.
2. Locate gears by using the Transmission Index.
  - a. Use the transmission index on page 9 to find the page which covers the transmission on the truck you are repairing.
  - b. Turn to the page for that transmission find the proper axle ratio and tire size, then locate the gear service part numbers.

18124-5 SHOCK ABSORBER KIT (FRONT or REAR)

## SHOCK ABSORBER IDENTIFICATION CHART

The production number is stamped on the barrel of each shock absorber as an identification marking. The following chart will provide quick identification of the service kit number when the identification marking is known. Also shock absorber kits may be selected by model, year and description under group numbers 18124 and 25 which follow the chart. Shock absorber kits include insulators, bolts, nuts and washers.

**19C705-8      REFRIGERANT LINE REPLACEMENT and REPAIR PARTS**

To simplify part number determination and complexity and to reduce look-up time for air conditioning hoses the following summary describes the various service methods:

1. Hose originally used in production is serviced.

Example: Original production part number EOHT 19867-AB is supplied for service as part number EOHZ 19867-A as shown on page 10 of the IDENTIFICATION CHART and on page 8 of the APPLICATION CHART.

2. Hose originally used in production is not supplied for service and has been replaced by detail parts i.e. bulk hose (which must be cut to length) and assorted fittings.

Detail parts include:

Push-on type tube fittings (includes clamps and "o" rings) and bulk hose. Original production hose assemblies are fabricated from bulk hose (cut to length indicated) and add necessary fittings (listed by code number and cross-referenced to part number on page 16).

Example: Original production part number DOHA 19972-AS is replaced by 78 inches of 13/32" I.D. bulk hose (part number D2AZ 19C708-B) and one each of fitting code J44 which cross-references to fitting service part number D2AZ 19D695-AJ and fitting code ZE6 which cross-references to fitting service part number D2AZ 19D695-CD. The original production part number DOHA 19972-AS is shown on page 10 of the IDENTIFICATION CHART and on page 9 of the APPLICATION CHART. The fitting code number to part number CROSS-REFERENCE CHART is shown on pages 11 thru 18

Air Conditioning hose information is listed as follows:

	PAGE
INSTALLATION INSTRUCTIONS	1 through 5
APPLICATION CHART	6 through 12
IDENTIFICATION CHART	13 & 15
FITTING CROSS-REFERENCE CHART	16 through 23

More detailed instructions are included with the IDENTIFICATION CHART, APPLICATION CHART and FITTING CROSS-REFERENCE CHART.

**1980/  
TRUCK SERIES 600/900**

19C705-8 REFRIGERANT LINE REPLACEMENT and REPAIR PARTS cont'd.

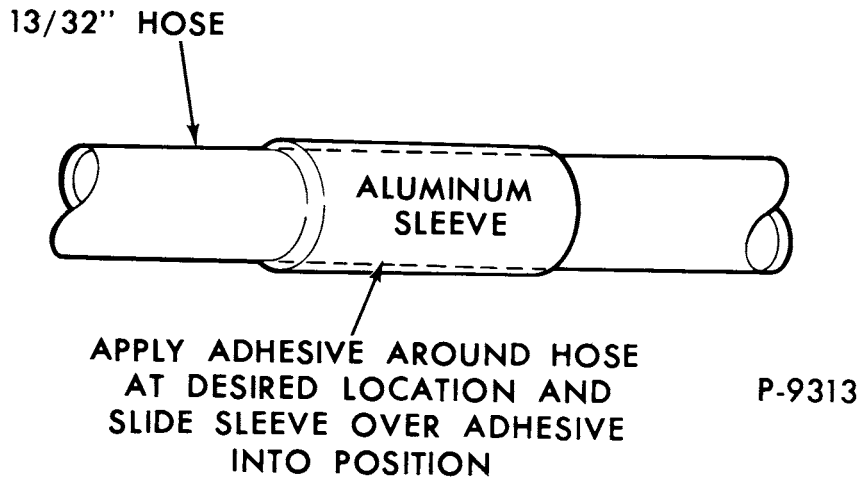

INSTALLATION INSTRUCTIONS

HOSE GUARDS

FOAM RUBBER SLEEVE: To protect 5/8" rubber air conditioner hose from direct rubbing against other parts and to reduce hose vibration noise.

ALUMINUM SLEEVE: To protect 13/32" discharge hose where hose contacts sharp edges in routing through the radiator side support.

1. Slide sleeve on hose before installing end fittings.

NOTE: Sleeve can be cut lengthwise and formed around other hose sizes.

2. Use COAZ 19552-A or 8A 19552-B adhesive to secure sleeve in desired position.

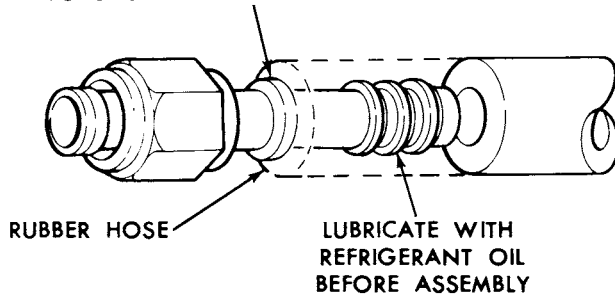

19C705-8 REFRIGERANT LINE REPLACEMENT and REPAIR PARTS cont'd.

INSTALLATION INSTRUCTIONS - continued

DETAIL PARTS and HOSE ASSEMBLIES

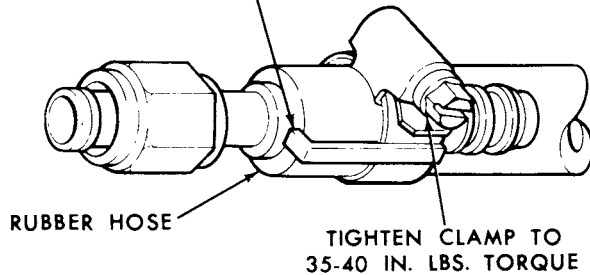

1. Note defective hose routing before removal.
2. Repair existing rubber or nylon hose on vehicle if feasible.
  - a. Repair cuts and similar failures, in otherwise sound existing hose assemblies, by using one push-on hose splicer or two splicers with required length of bulk hose.
3. Remove defective hose if splicing is not acceptable.
  - a. Discharge the system if not completely discharged, following the procedure outlined in the shop manual.
  - b. For those liquid lines (5/16" I.D.) having a self-sealing, quick disconnect coupling on one end, the coupling should be left on the vehicle. The new hose assembly will adapt into this coupling with 1/2"-20 male thread and an external o-ring seal.
4. Assemble the new hose as shown below if component parts are used.

**PUSH FITTING INTO HOSE BY HAND  
WITH ROTATING MOTION  
TO SHOULDER OR BEAD OF FITTING**

- a. Select proper end fittings, splicers, hose guards, and hose size required to replace the original hose assembly. A visual comparison is required for applications not listed.
- b. Cut hose to required length. Keep ends square and remove loose fragments.
- c. Lubricate barbed end of fittings and splicers with a few drops of clean refrigerant oil.

**ALIGN SPACER BAR TO  
END OF HOSE**

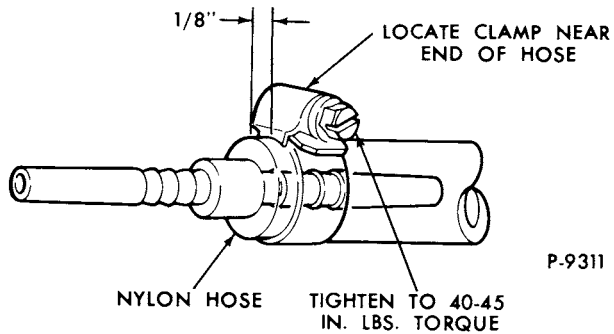

- d. Slide loose clamps on hose, force fittings into hose (by hand) with rotating motion.  
**CAUTION:** Do not go past shoulder or scratch fitting with tools, this fitting must be inserted by hand.
- e. Position clamp so that spacer tab is over end of rubber hose and tighten until clamp starts to cut hose (Tighten to 35-40 in. lbs. torque)

**1980/  
TRUCK SERIES 600/900**

19C705-8 REFRIGERANT LINE REPLACEMENT and REPAIR PARTS cont'd.

## INSTALLATION INSTRUCTIONS – continued

## DETAIL PARTS and HOSE ASSEMBLIES – continued

- f. For nylon hose splicers only, position clamp approx. 1/8" from end of hose (tighten to 40-45 in. lbs. torque)

5. Route the new hose, using the original installation as a guide.

If simplified hose with aluminum tubing and splicer is used, bend the tubing as outlined below:

- a. Bend the aluminum tubing by hand to replace the bends of the original hose, making the bends as simple as possible.
- b. Drill new holes through the radiator support and side shield as required to make the installations using simplified tube bends.

6. Install and torque new hose assembly.

NOTE. When installing assembly, tighten coupling nut finger tight, then torque per chart below using a back-up tube wrench. Further tightening may distort fitting and result in an imperfect seal. Be sure that o-ring is in place on o-ring type fittings. Hoses must be installed with no twist in them.

Fitting Size or Description	Thread Size	RECOMMENDED TORQUE (IN FT. LBS.)	
		O-RING Type	Flare Type
3/8"	5/8"-18	11-13	15-19
1/2"	3/4"-16 or 18	15-20	21-27
5/8"	7/8"-14 or 18	21-27	25-31
3/4"	1 1/16"-14 or 18	28-33	33-40
Adapter for Self-sealing Coupling	1/2"-20 7/8"-20	8-12 21-27	
Compressor fitting and service valve	1"-14	20-40	
Block fitting plate bolt		20-30	
Pressure relief valve (into block) fitting	3/8"-24	4-11	

7. Rework the existing hose support clamps if required

- a. Check for correct installation and proper routing for clearance with other vehicle components.
- b. Evacuate, charge and leak test the system following the procedure outlined in the vehicle shop manual

# 1980/ TRUCK SERIES 600/900

## 19C705-8 REFRIGERANT LINE REPLACEMENT and REPAIR PARTS cont'd.

- To determine the correct hose part number or detail part numbers you must either:
1. Know the identification number from the existing hose.  
or
  2. Be able to visually identify the existing hose and select appropriate details from the Fitting Cross-Reference Chart shown on pages 14 thru 16.

Example No. 1: If the identification number is DOHA 19972-AF, the Identification Chart (on page 11) indicates (1) that the service assembly number is DOHZ 19972-K and (2) that the hose may be fabricated from 74" of 13/32" I.D. bulk hose (part number D2AZ 19C708-B), one piece of Fitting Code A44 (part number D2AZ 19D695-E) and one piece of Fitting C44 (part number D2AZ 19D695-N).

Example No. 2: If the identification number is DOHA 19867-AJ, the Identification Chart (on page 11) indicates the hose assembly is not serviced (★) and that the hose must be fabricated from 34" of 5/8" I.D. bulk hose (part number D2AZ 19C708-D), one piece of Fitting Code G56 (part number D2AZ 19D695-AD) and one piece of Fitting Code ZE6 (part number D2AZ 19D695-CE).

19C705-8 REFRIGERANT LINE REPLACEMENT and REPAIR PARTS cont'd.

**FITTING CROSS-REFERENCE CHART**

There are three ways of selecting hose and fitting part numbers.

1. From Code Number (shown in the Identification or Application Charts) to the Part Number listed below.
2. From a visual inspection of the existing hose and selection of appropriate details using the following instructions:
  - a. Determine Fitting Size.  
Diameter of tube at a point behind the nut indicates fitting size, e.g. 3/8", 1/2", 5/8" or 3/4".

Select Fittings and Splicers from the illustrations and text that follows. The necessary clamps and o-rings are included with all Fittings and Splicers and are also supplied for service as separate parts.

**FITTINGS**

Determine Fitting size from the information shown below:

ORIGINAL TUBE O.D.	FRACTIONAL FITTING SIZE	INDUSTRY SIZE NO.	THREAD SIZE	
			SAE 45° FLARE O-RING (FEMALE) O-RING (MALE FLARE)	O-RING (MALE SWIVEL)
5/16"	3/8"	6	5/8"-18	5/8"-18
13/32"	13/32"	8	3/4"-16	3/4"-18
1/2"	5/8"	10	7/8"-14	7/8"-18

b. Determine Hose Size

e.g. tube O.D. is 5/16" and hose I.D. is 5/16" (size No. 6, part number D2AZ 19C708-A).  
Measure end of tube (not barbs). The tube O.D. matches the I.D. of the required hose

**BULK RUBBER HOSE**

Select the appropriate hose from the sizes listed below:

ORIGINAL TUBE O.D.	REPLACEMENT HOSE I.D.	INDUSTRY SIZE NO.	PART NUMBER	MOTORCRAFT NUMBER
5/16"	5/16"	6	D2AZ 19C708-A (15')	*YF-248
13/32"	13/32"	8	D4AZ 19C708-A (50')	*YF-599
			D2AZ 19C708-B (15')	*YF-249
1/2"	1/2"	10	D4AZ 19C708-B(50')	*YF-600
			D2AZ 19C708-C(15')	*YF-250
5/8"	5/8"	12	D4AZ 19C708-C(50')	&YF-601
			D2AZ 19C708-D(15')	*YF-251
			D4AZ 19C708-D(50')	*YF-602

INDEX

PART NAME	GROUP NUMBER	PART NAME	GROUP NUMBER
<b>A</b>		<b>B — Cont'd</b>	
Adjuster (front door latch actuating rod)	21816	Bracket (body side panel lower)	29348-9
Adjuster handle kit (front seat)-driver	620A69	Bracket (body side step)	29400-1
Air foil (front)	001A06	Bracket (body side step hinge)	200A08-9
Air spring kit (front seat)-driver	620A68	Bracket (clutch pedal assist spring)	01526
Arm (front seat height adjusting)-driver	620A44	Bracket (cowl bar)	021A88
Arm (front seat suspension equalizer)-driver	620A00-1	Bracket (cowl bar support)	024A18
Arm assy. (body side front rear shock)	27200	Bracket (cowl top to radiator support brace)	020A76-7
Arm & bracket assy. (visor)	04144-5	Bracket (eng. cover front)	105A50
<b>B</b>		Bracket (door vent window frame stablizer)	22288-9
Bar (back window division)	42076	Bracket (eng. cover rear)	10536
Bar (floor pan foot rest)	12002	Bracket (eng. cover side)	101B66
Bar (front door vent window division)	22296-7	Bracket (floor side inner member plate)	101B30
Bar (front seat adjusting front torsion)	617A24	Bracket (front air deflector)	001A08-9
Bar (front seat adjusting rear torsion)	617C62	Bracket (front body lower extension innermounting)	00258-9
Bar (front seat suspension torsion)-driver	62039	Bracket (front body lower extension outer mounting)	002A58-9
Bar (windshield division)	03162	Bracket (front door arm rest mounting)	24116
Bar assy. (cowl)	02402	Bracket (front door check arm on body)	23510
Base (front seat suspension)-driver	62036-7	Bracket (front door outside handle attaching)	224A00-1
Base assy. (front seat suspension complete)-driver	61738	Bracket (front door trim panel)	21032
Bearing (body pivot on body)	00254-5	Bracket (front door vent window division bar lower)	22912
Bearing (front door check roller)	235A60	Bracket (front door vent window lower pivot)	22954
Bearing (front seat shock absorber)-driver	620A48-50	Bracket (front door vent window upper pivot)	21464-5
Bearing (front seat shock absorber lever)-driver	60325	Bracket (front door window glass channel rear)	23296
Bearing (front seat weight adjusting lever)-driver	620A46	Bracket (front seat back adjusting)-driver	610B92-3
Bearing & lever assy. (front seat suspension)-driver	618A63	Bracket (front seat bumper)-passenger	619A78
Belt (sleeping compt. complete)	46892	Bracket (front seat cushion frame to track)	60388
Belt assy. (front seat complete)	611A72	Bracket (front seat mounting)-driver	62570
Belt assy. (front seat complete center)	611B60	Bracket (front seat upper track support)-driver	618A71
Belt & buckle assy. (sleeping compt.)	46830	Bracket (front seat weight adjusting)-driver	620A60
Bezel (front seat back latch handle)	62672	Bracket (instrument panelash receptacle housing)	04557
Bolt (front seat back pivot arm)	60392	Bracket (instrument panel)	04510
Bolt (front seat belt anchor eye)	61212	Bracket (outside assist handle)	403E38
Bolt (front seat suspension)-driver	62065	Bracket (instrument panel brace)	045F10
Boot (door inside handle)	226A06	Bracket (instrument panel to cowl side)	04366
Bow (roof trim panel support center)	51952-5	Bracket (instrument panel to cowl top inner)	044C32-3
Bow (roof trim panel support side)	51952-5	Bracket (instrument panel to engine cover mounting)	044F41
Brace (back panel strainer to back window frame)	40264-5	Bracket (instrument panel lower extension to engine cover)	043A84
Brace (body side extension rear)	11552-3	Bracket (instrument panel flasher mount)	04542
Brace (body side panel front)	28260	Bracket (instrument panel lower extension to floor)	044G22
Brace (body side panel rear)	27726	Bracket (instrument panel lower extension to pillar)	043A73
Brace (brake pedal support)	01524	Bracket (instrument panel to front body pillar)	044B50-1
Brace (cowl side panel)	020A62	Bracket (rear floor cross member upper)	403D32
Brace (dash panel to frame)	01726-7	Bracket (roof bow mounting)	508A16
Brace (front body pillar)	02582	Bracket (roof bow to header)	508A16
Brace (front wheelhouse panel front)	024A40	Bracket (storage compt. door check cable)	279C36
Brace (instrument panel to brake pedal bracket)	04576	Bracket (upper back panel reinforcement)	403D52
Brace (instrument panel to dash)	044F48	Bracket (visor arm)	04122
Brace (side step)	200L52	Bracket (windshield defroster mounting)	01420
Brace (trans. control selector to dash extension)	12208-9	Bracket assy. (clutch pedal support to front panel)	015A12
Bracket (air foil front)	001A26	Bracket assy. (body mounting)	001N01
Bracket (air scoop roof front)	50738	Bracket assy. (door window lower stop)	21742
Bracket (body door check on door)	27218	Bracket assy. (front door window regulator equalizer arm)	23230
Bracket (back panel trim panel)	403D50		
Bracket (body front air deflector upper)	001A10-1	Bracket assy. (roof air deflector support rear)	500K23
Bracket (body lift)	00334	Bumper (front door window stop)	21762
Bracket (body rocker panel)	104K38-9	Bumper (front seat cushion panel)	60578
Bracket (body rear cross member reinforcement)	403E08	Bumper (front seat jounce)-driver	60300

C and CT Series

**CAB ORDERING INSTRUCTIONS**

- Equipment included with each cab may vary due to ongoing production changes.

Current production cabs are available for service. When ordering a cab the following information must be provided:

- Ordering dealer name, address and P&A code
- "Ship to" name and address (if not ordering dealer)
- Series and model description
- Vehicle serial number
- Cab configuration number
- Engine make, model and displacement
- Type of transmission, model and speeds
- Exterior paint (current colors only)
- Type of brakes (air or hydraulic)

Note: Submit this information by phone to the order processing center

**EXTERIOR PAINT COLORS**

Cabs are available in prime and current production paint colors for U.S. and in prime only for Canada. D.S.O. colors are not available. These cabs must be ordered in an alternative color, and the stripes, etc., must be added locally.

**SKELETON CABS**

YEAR	MODEL	PART NUMBER
80/	C-CT700/800 (diesel) -- w/A/T	★FOHZ 9100001-A

**INCLUDES**

- Primed sheet metal
- Doors

**DOES NOT INCLUDE**

- Glass
- Trim and hardware

**PARTIALLY DRESSED CABS**

**CL-CLT Series**

**CAB ORDERING INSTRUCTIONS**

● Equipment included with each cab may vary due to ongoing production changes.  
Current production cabs are available for service. When ordering a cab, the following information must be provided:

(COMPLETE CAB)

- Ordering dealer name, address and P and A code
- "Ship to" name and address (if not ordering dealer)
- Series and model description
- Cab configuration number
- Vehicle serial number
- Paint (current colors only)
- Trim color (owner/operator interior package only) charcoal or caramel
- Engine make and model

(IN ADDITION FOR SKELETON CABS SPECIFY)

- Type of transmission, model and speeds
- Provisions for air conditioning

Note: Submit this information by phone to the order processing center

**EXTERIOR PAINT COLORS**

Cabs are available in prime and current production paint colors for U.S. and in prime only for Canada. D.S.O. colors are not available. These cabs must be ordered in an alternative color, and the stripes, etc., must be added locally.

Service cabs for the CL-CLT series are equipped with standard cab mountings. If the parts on the original cab are for the Easy Riding Cab Air Suspension System and are not reuseable, the following parts must be ordered as required.

Qty. Req'd.	Part Number	Description
1	EOHZ 5A118-A	Bracket (cab forward hinge)-R.H.
1	EOHZ 5A118-B	Bracket (cab forward hinge)-L.H.
2	D8HZ 5B404-A	Bracket assy. (cab mounting to spring)
2	D8HZ 5B406-A	Gusset (cab mounting spring bracket)
2	D8HZ 5411-B	Bracket (cab to frame suspension arm)

In all instances when the truck is equipped with the Easy Riding Cab Air Suspension System, parts unique to the standard cab must be replaced by either the corresponding original or a new service replacement part. All cabs have pre-drilled holes in the sub-frame for both types of cab mountings.

## BODY BOLT CHART

### INSTRUCTIONS

Truck bodies for Conventional Cabs (body type 81) are assembled to the frame by various bolts and related parts.

The illustrations on the next page show a typical example of a Conventional Cab frame. The body bolt locations are numbered consecutively beginning at the cowl from 1 to 6 as required. For quick identification the related parts used at each location are arranged alphabetically as follows:

Absorbers                  Bolts                  Insulators                  Nuts                  Retainers                  Washers

#### TO USE BODY BOLT CHART

- 1) Determine the location of the parts required by referring to the illustrations.
- 2) Select the necessary parts listed for each location.

For example:

To find the parts necessary to install a 1980/ L 800 Conventional Cab at the front mount:

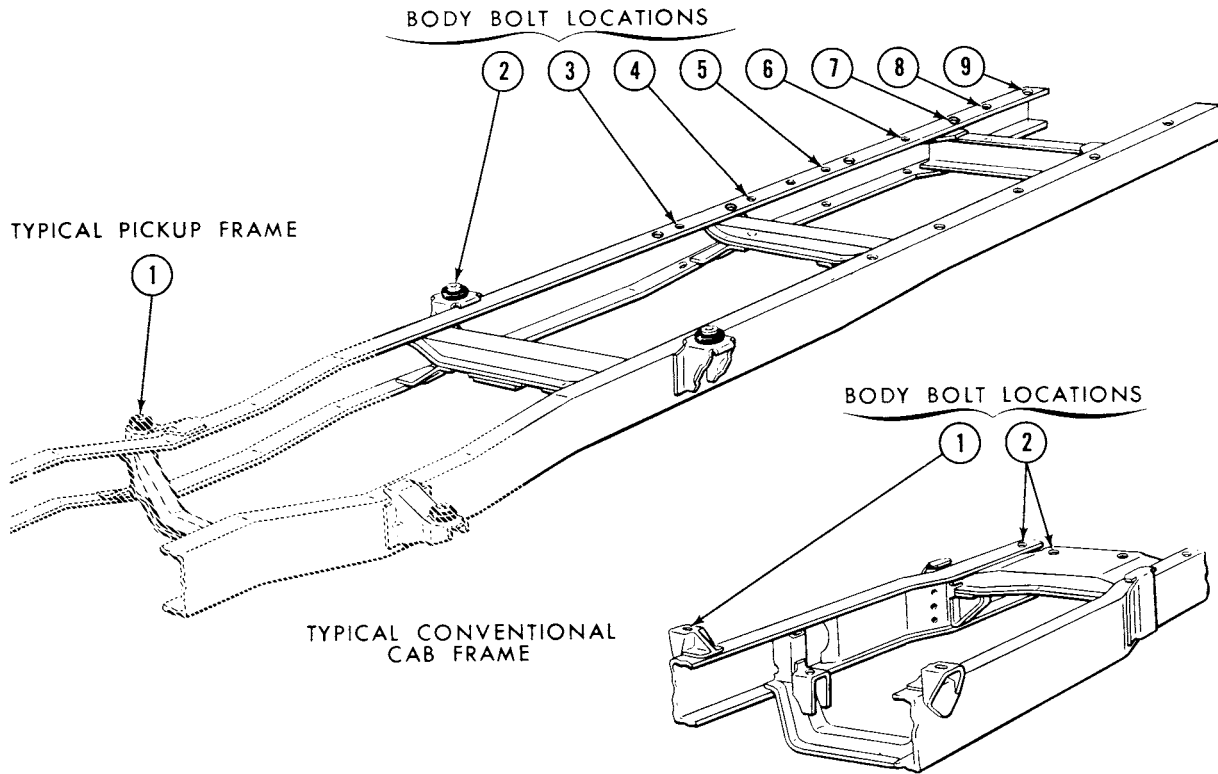

- 1) Refer to the illustration and determine that the front mount is the No. 1 Location.
- 2) Refer to the chart under Body Bolt Location No. 1.
- 3) The parts required are:

NAME	PART NUMBER		PART NUMBER
Bolt	58687-S2	Spacer-square	D0HZ 5000130-A
Insulator	D0HZ 8000149-A	Washer-flat	44735-S8
Nut-hex. 1/2"-13	55697-S8	Washer-flat-9/16"	374049-S
Spacer-round	NS - improvise		

#### PARTS NOT AVAILABLE FOR SERVICE

Parts identified by a black star ★ are not available for service and must be improvised or procured locally.
