HOW TO USE THIS CATALOG

There are three ways of finding part numbers if the group number is not known.

1. By Part Name
2. By Illustration
3. By Identification

Should an inquiry be received for an Accelerator Assy. for a 1990 CL-CLT:

BY PART NAME -

- A. Refer to the Chassis Parts Alphabetical Index.
- B. Refer to the alphabetical nomenclature and find the part name "Accelerator Assy".
The group number listed is 9725.
- C. Refer to group number 9725 and locate 1990 in the "YEAR" column. Find the series CL-CLT in the "MODEL/RESTRICTIONS" column.
- D. The part number shown is D8HZ 9725-A.

BY ILLUSTRATION -

- A. Refer to the Illustration Catalog (Form FPS 8538-B) to the tabbed divider marked "FUEL, CARBURETOR, ACCELERATOR".
 - B. Refer to the index immediately behind the divider and find the illustration titles for the 1990 CL-CLT Series.
 - C. Under the heading "ACCELERATOR and TRANSMISSION" find the Accelerator Assy. illustration.
 - D. Refer to the illustration designated (on page 1 of Illustration Section 97.1) and find the group number for the accelerator assy, basic 9725.
 - E. Refer to group number 9725 in this Text Catalog and locate 1990 in the "YEAR" column. Find the series CL-CLT in the "MODEL/RESTRICTIONS" column.
 - F. The part number shown is D8HZ 9725-A.

HOW TO USE THIS CATALOG — Cont'd

BY IDENTIFICATION —

Certain parts and most major assemblies are identified with a part number shown on an attached tag or plate or on the part itself. Reference to identification numbers is made throughout the catalog and cross reference charts are included in some sections to provide immediate knowledge of the service part number when the identification number is known. All identification information other than charts will be preceded by the symbol (#).

IMPORTANT — Identification tags and plates must be retained with the part or assembly with which they are originally supplied.

R.H. AND L.H. PARTS

The driver's side is the left hand side of the vehicle and determines whether such parts as fenders, lamps, etc. are right or left hand.

Most Right Hand and Left Hand parts are listed in adjacent columns as shown in the following examples:

YEAR	MODEL/RESTRICTIONS	PART NUMBER		DESCRIPTION		QTY.
90	F600/800	(RH) E0TZ 1020124-A	(LH) E0TZ 1020125-A			1
90	CL-CLT900	(RH) D8HZ 9020124-A	(LH) D8HZ 9020125-A			1

MOTORCRAFT SALES PART NUMBERS

To facilitate the stocking and handling of those service parts which are assigned both service part numbers and Motorcraft Sales Part Numbers, the Motorcraft Sales Part Numbers are preceded by an asterisk (*) and are usually located at the beginning of the description column.

For example, refer to Section 96, group 9600. The service part number for a carburetor air cleaner element used on a 1990/C-CT600/800 -- diesel with an 8 cyl. 501N C.I.D. engine is E1HZ 9601-B and the Motorcraft Sales Part Number is FA 718. In the catalog this item will be shown as E1HZ 9601-B *FA718.

YEAR	MODEL/RESTRICTIONS	ENGINE		PART NUMBER		DESCRIPTION
		CYL.	C.I.D. (C.C.D.)	AIR CLEANER ASSY.	ELEMENT	
90	C-CT600/800 -- diesel	8	501N	E2HZ 9600-M	E1HZ 9601-B *FA718	Standard capacity

FORMATS

Various formats are used throughout this catalog to coincide with the normal procedure for selecting the affected part numbers. Most areas of the catalog use a format arranged in the order shown below:

Column —

1. Model year
2. Type of vehicle or equipment within a specific model year
3. Complete part number
4. Description, size, etc.
5. Quantity required per vehicle

Formats peculiar to a particular area of the catalog are generally self explanatory. When necessary, instructions are shown at the beginning of the affected group. For instance, the various charts and parts list method of cataloging in the Carburetor Section are explained on Page 1 of Section 95.

EXHAUST SYSTEMS CERTIFICATION

"For their intended application as specified in this catalog, the exhaust system parts and systems listed for sale have been certified to be in compliance with the requirements of the rules of the Florida Department of Environmental Regulation (Chapter 17-18, Part III of the Florida Administration Code)."

EXPLANATION OF THE FORD PART NUMBERING SYSTEM

For greater convenience this catalog is divided into specific sections, such as brakes, front suspension, engine, transmission, etc. For example, FRONT SUSPENSION appears in Section 32, STEERING WHEELS in Section 36, REAR AXLE in Section 40, etc. The applicable exploded illustrations are contained in separate sections which are related to the Text Section numbers. For example, STEERING WHEEL illustrations appear in Illustration Section 36 of the Illustration Catalog, FPS 8538-B.

The part number groups, part names and the section numbers under which each is listed are shown on pages 5, 6, 7 and 8 of the General Information Section.

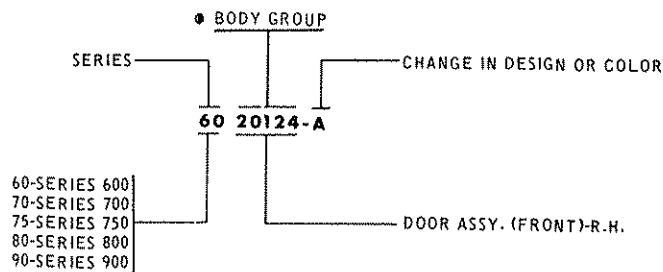

In numerical listings, expanded group numbers will be considered to follow the same sequence as the regular group numbers from which they are expanded and are arranged in Catalogs as follows:

3511
3C511
3518
3C518

Illustrations contain group numbers only, therefore, it is necessary to refer to the group within this Text Catalog for complete applicable part numbers.

MASTER CROSS REFERENCE GUIDE FOR THE TRUCK SPECIFICATION LIST (T.S.L.) SERIES 600/900

A revised T.S.L. for Louisville-built trucks was put into use on May 1, 1972 and was of the type shown on page 52.

T.S.L.'s are reduced to a decal and located as follows:

B Series and F cowl models - taped in glove box, to be applied after unit is completed at body company.

C-CT Series - bottom of passenger door.

CL-CLT Series - wrap around gear shift lever with incomplete vehicle manual.

F Series (except cowl) and L-LN-LNT-LT-LTS Series - between back glass and door facing on passenger side of cab.

Use the listing below to determine service part numbers or parts lists for the numbers shown on the upper part of the T.S.L.

Use the information on page 45 to decode the information shown in the lower part of the T.S.L.

NOTE: Check the catalog even though the D.S.O. box is checked on the upper part of the T.S.L. Many parts and

assemblies used on these vehicles may be standard or optional on other vehicles. If not listed

in the catalog, order the part on a Special Order basis through the dealer's Order Processing Distribution Center.

1990/ TRUCK SERIES 600/900

T.S.L. LOWER SECTION

GENERAL EXPLANATION

a. Boxes are identified by combining the row designation (A, B, C, D, E) with the column designation (1 through 31) to form a coordinate, i.e. "A1".

b. Related parts are grouped on the form:

TYPE of PART	BOXES	TYPE of PART	BOXES
Brakes	A1 - A9	Power train	B1 - B22, C1 - C2
Electrical	A10 - A23	Speedometer and tach	C3 - C11
Exhaust and suspension	A24 - A27	Wheels, hubs and drums	C12 - C13
Steering wheel	A28	Cab detail	D1 - D18
Fan	A30	Miscellaneous	E1 - E26
GVW	A31		

c. Boxes are marked in several different ways:

1) If "w" appears in a box, the part is a D.S.O. application and an explanation will appear in the lower portion after its coordinate (i.e. (D9HZ 90018A90 - A Graham roof vent"). Order the part number shown through the dealer's Order Processing Distribution Center.

2) If "X", a code number (1,2), or a code letter (A,B) appears in a box, refer to CODE EXPLANATION below to determine the meaning of the code.

EXAMPLE: "X" in Box A8 means the unit has a vacuum reserve tank, as noted under A8 in the listings below.

3) If " - " appears in a box, the item is not used on that unit or the item is "Standard Equipment". For instance, a " - " appearing in B13 on the T.S.L. for a truck with a manual transmission would indicate that the clutch used is the "standard" clutch for that unit.

4) In some cases, an engineering part number will appear in the box. This number may be converted into a service part number by using the Master Cross Reference List or the listing which is provided below.

d. Items which appear in the "Tires - Paint - DSO" Section without coordinates are D.S.O. items not covered in other portions of the Form.

1990/ TRUCK SERIES 600/900

TRUCK SPECIFICATION LIST (TSL) – 1981/

An improved T.S.L. for Kentucky-built trucks was put into use on March 15, 1981 for LTL9000 units and on April 1, 1981 for the balance of trucks produced at Kentucky Truck. An example of this free-flow type T.S.L. is shown in column's 41, 42 and 43.

The In-Cab T.S.L. copy is located on the left sun visor (common position for all completed trucks) enclosed in a clear plastic sleeve. The T.S.L. will be included with the boxed parts for buses and stripped chassis.

Each new T.S.L. includes general information such as:

- Dealer order number
- Series and model
- Wheelbase
- Serial Number (last eight digits of vin number)
- D.S.O. reference number

In addition, a listing appears in commodity code sequence which includes:

- Commodity Code (0405)
 - Quantity required will be 1 unless indicated otherwise
 - Engineering part number (E0HT 4602-NCA)
 - T.S.L. description (Driveshaft assy.)
 - Part description – additional descriptive and proprietary information for U.S. Units only
 - Type part includes D.S.O. Option number, if applicable
- If blank, part is standard equipment or R.P.O. on this vehicle.

Commodity codes appear in numerical sequence on each T.S.L. and have been arranged as follows:

First Two Digits of Code	Major group	First Two Digits of Code	Major Group
01	Wheels, Hubs and Drums	10	Alternator, Battery, Cluster and Starter
02	Brakes	02	Brakes
03	Front Axle and Steering	20	Cab Detail
04	Rear Axle and Driveshaft	12	Distributor and Governor
05	Frame, Suspension and Exhaust	06	Engine
06	Engine	16	Fenders, Hood and Running Boards
07	Transmission and Clutch	05	Frame, Suspension and Exhaust
08	Radiator and Grille	03	Front Axle and Steering
09	Fuel System and Manifolds	09	Fuel System and Manifolds
10	Alternator, Battery, Cluster and Starter	18	Heater, Air Conditioning, Radio and Shock Absorbers
12	Distributor and Governor	13	Lamps and wiring
13	Lamps and wiring	99	Paint
16	Fenders, Hood and Running Boards	08	Radiator and Grille
17	Speedometer, Mirrors, Bumper and Wipers	04	Rear Axle and Driveshaft
18	Heater, Air Conditioning, Radio and Shock Absorbers	17	Speedometers Mirrors, Bumper and Wipers
20	Cab Detail	07	Transmission and Clutch
99	Paint	01	Wheels, Hubs and Drums

The second two digits of each code identify specific parts within a major group.

Once the engineering number has been determined from the Commodity Code Listing, use the Master Cross Reference and/or Master Parts Catalog to select the service part number required. D.S.O. parts should be ordered through your Master Parts Distribution Center.

ADDITIONAL COPIES T.S.L.

For model years 1978/, order from the "Ford Parts and Service Division, Special Order Section P.O. Box 3020 Livonia, Mich. 48151".
(Cost per T.S.L. \$3.00 each)

HOW to IDENTIFY WHEELS, RIMS, FLANGES and LOCK RINGS

1. Many wheels and rims may be identified by a stamping number. When the stamping number is known, refer to the Guide on Page 1 for the appropriate service part number.
2. When the stamping number is not known, wheels and rims and their related flanges and lock rings may be identified as follows
 - (a) Determine the type of wheel or rim from the illustration below.
 - (b) Determine the size of the wheel or rim. If this is not known, check the tire size and refer to the tire size to Wheel or Rim Size Chart on page 3 of this section. This chart also lists the various truck series on which the tires and their related wheels or rims are used.
 - (c) When the size of the wheel or rim is known, refer to the Wheel, Rim, Flange and Lock Ring Chart (page 3).

HOW TO LOCATE FRONT BRAKE PARTS

1. Use the Front Brake T.S.L. † Cross Reference Guide (below) to find the correct brake parts list.
2. Use the Front Brake Model Application Chart (which follows the T.S.L. Chart) to find the correct brake parts list when a T.S.L. number is not available.

Where the T.S.L. says See frt. axle, the front axle number shown on the T.S.L. is listed in the guide below.

FRONT BRAKE MODEL APPLICATION CHART

1. Determine truck series and model year.
2. When optional brake sizes are shown, determine brake size. The brake size shown is the inside diameter of the brake drum and the width of the related brake shoe lining.
3. When different axle capacities are shown for the same brake size, determine axle capacity from truck warranty plate code.
4. Determine if the brake system is hydraulic or air type and select appropriate parts list number.
5. Refer to affected parts list. Brake component parts lists appear in numerical sequence in this section following the application chart. Brake drums are not included in the parts lists. They are listed with the appropriate hub assembly under group 1104 in Section 11.
6. Refer to the appropriate section and page of the Truck Illustration Catalog when necessary for the group numbers of the required parts. Brake components are also listed by part name with their related group number in the Index at the beginning of Section 10.

REAR BRAKE MODEL APPLICATION CHART

1. Determine truck series and model year.
2. When optional brake sizes are shown, determine brake size. The brake size shown is the inside diameter of the brake drum and the width of the related brake shoe lining.
3. When different axle capacities are shown for the same brake size, determine axle capacity from truck warranty plate code.
4. Determine if the brake system is hydraulic or air type and select appropriate parts list number.
5. Refer to affected parts list. Brake component parts lists appear in numerical sequence in this section following the application chart. Brake drums are not included in the parts lists. They are listed with the appropriate hub assembly under Group 1109 in Section 11.2
6. Refer to the appropriate section and page of the Truck Illustration Catalog when necessary for the basic or group numbers of the required parts. Brake components are also listed by part name with their related basic or group number in the Index at the beginning of Section 10.
